'Elder' must be replaced with 'eldest'. The definite article 'the' is used before a superlative degree. Hence, 'Meera is the eldest' is the most appropriate answer.

**Sol.510.(c) no one was knowing**

The given sentence is in the simple past tense so the verb must be used in its past form(V<sub>2</sub>) and not in the past continuous form(was +V-ing). Hence, 'no one knew(V<sub>2</sub>)' is the most appropriate answer.

**Sol.511.(b) is quite too**

The use of 'quite' is irrelevant in the grammatical context of the given sentence as 'too...to' is a fixed pair. Hence, 'is too simple for me to answer' is the most appropriate answer.

**Sol.512.(c) have respond**

"Have + V<sub>3</sub>(third form of the verb)" is grammatically the correct structure for the given sentence. Hence, 'have responded(V<sub>3</sub>)' is the most appropriate answer.

**Sol.513.(d) confirm me whether you**

The use of the pronoun 'me' is grammatically incorrect in the given sentence so it must be removed. Hence, 'confirm whether you' is the most appropriate answer.

**Sol.514.(d) there was a good idea**

'Idea' in the given sentence is a singular subject and for it, we will use 'it' as a singular pronoun and not 'there'. Hence, 'it was a good idea' is the most appropriate answer.

**Sol.515.(a) three breaks-in**

'Break-in' is a phrasal verb which means to enter a building by force, usually in order to steal something. However, the given sentence talks about three attempts so we will use the plural form of 'break-in'. Hence, 'three break-ins' is the most appropriate answer.

**Sol.516.(d) can have been**

We will replace 'can' with 'could' because 'could' sounds more polite than 'can'. Hence, 'could have been' is the most appropriate answer.

**Sol.517.(d) No error.**

**Sol.518.(a) carry milk**

We will replace 'carry' with 'carrying' in the last part of the given sentence as it requires a gerund(V-ing). Hence, 'carrying milk' is the most appropriate answer.

**Sol.519.(c) creation in the world**

According to the "Subject-Verb Agreement Rule", 'One of/ Each of/ Most of/ None of + Plural Subject' is grammatically the correct structure. Similarly, the given sentence will have 'creations' as a plural subject. Hence, 'creations in the world' is the most appropriate answer.

**Sol.520.(c) No error.**

**Sol.521.(c) on myself**

'Angry with someone' is grammatically the correct phrase for the given sentence. Hence, 'angry with myself' is the most appropriate answer.

**Sol.522.(c) No error.**

**Sol.523.(a) slow, and**

The given sentence needs an 'adverb'. Hence, 'slowly' is the most appropriate answer.

**Sol.524.(c) two dozens**

We never write 'dozens' if we are using a numerical amount like two, three, etc. before it. For example, 'two dozens of bananas' is incorrect but 'three dozen of mangoes' is correct. Similarly, the given sentence has 'two' as a numerical value. Hence, 'two dozen' is the most appropriate answer.

**Sol.525.(b) your work**

'Our' is the possessive form of 'we' and it means something belonging to us(more than a single person). Similarly in the given sentence, the work belongs to both the persons and not to a single person. Hence, 'our work' is the most appropriate structure.

**Sol.526.(b) these kind**

'This' and 'kind' are in singular form whereas 'These' and 'kinds' are in plural form. Hence, 'these kinds' will be grammatically correct for the given sentence.

**Sol.527.(d) for walking**

When we use verbs like walk, talk, ride, drink, etc. as nouns, we put the indefinite article 'a' before them as per their sound. For example, we had a talk, let's go for a drive, etc. Hence, 'for a walk' is the most appropriate answer.

**Sol.528.(c) Among you and me**

We use 'among' for more than two persons and 'between' for two persons. However, there are two persons mentioned in the given sentence. Hence, 'Between you and me' is the most appropriate answer.

**Sol.529.(b) I get myself tired**

The use of the reflexive pronoun 'myself' is irrelevant according to the grammatical context of the sentence so it will be removed. Hence, 'I get tired' is the most appropriate answer.

## Solutions :-

### Sol.530.(d) If you have

If you have "If + had + V<sub>3</sub> .... could have + V<sub>3</sub>(third form of the verb)" is the correct grammatical structure for the given sentence. Hence, 'If you had' is the most appropriate answer.

### Sol.531.(a) my rest of remaining

We cannot use 'rest' & 'remaining' together in a sentence as it becomes the case of superfluousness(not necessary). Hence, 'remaining' will be removed from the sentence & 'the rest of my life' is the most appropriate answer.

### Sol.532.(d) We yet

'Still' means starting in the past and continuing until now. However, 'still' generally comes before a verb in the present perfect form(has/have) and 'yet' usually comes at the end of the sentence. Similarly in the given sentence, the time for catching the bus has started in the past and continued till now. Hence, 'We still' is the most appropriate answer.

### Sol.533.(a) Otherwise

'Otherwise' is a conjunction that means apart from that. However, 'But' is also a conjunction that is used for introducing an idea that contrasts with or is different from what has just been said. Similarly in the given sentence, the statement that the dog is harmless contrasts with its characteristic of being ferocious(violent). Hence, 'But' is the most appropriate answer.

### Sol.534.(b) besides her mother

'Besides' means 'in addition to something' & 'Beside' means 'at the side of, or next to somebody/something'. However, the given sentence states that the girl lay down on the bed next to her mother and went to sleep. Hence, 'beside her mother' is the most appropriate answer.

### Sol.535.(b) to the bed

### Sol.536.(d) different to what

There is a prepositional error in the given sentence. The preposition 'to' after 'different' must be replaced with 'from' because 'different' generally takes the preposition 'from' with it. Hence, 'different from what' is the most appropriate answer.

### Sol.537.(c) precedes before

We cannot write 'precedes' and 'before' together in a sentence as they have similar meanings & that will become a case of superfluousness(not necessary). Hence, 'before' must be removed from the sentence to make it grammatically correct.

### Sol.538.(c) avail this opportunity

'Avail' always takes the preposition 'of' and a reflexive pronoun(myself, yourself, ourselves, etc.) in accordance with the given subject(You). Hence, 'avail yourself of this opportunity' is the most appropriate answer.

### Sol.539.(c) he had been failed

The given sentence is in the simple past tense so the verb must be used in its simple past form(failed) and not in the past perfect form(had been failed). Hence, 'he failed' is the most appropriate answer.

**Sol.541.(c) His son-in-laws**

We can never write 'in-laws' because it is incorrect to add 's' in the suffix(of law). However, we generally write son-in-law for a single male and sons-in-law for more than one male. Similarly, the given sentence talks about two males. Hence, 'His sons-in-law' is the most appropriate answer.

**Sol.542.(a) At our colony**

The preposition 'at' is used when you are at a specific address, at a general location, and at a point. However, the preposition 'in' is used in a space, neighborhood, city and country. **Sol.544.(c) to go abroad**

We generally use the preposition 'from' with prevent not 'to'. Hence, we will replace 'to' with 'from' and 'from going abroad' becomes the most appropriate answer.

**Sol.545.(b) whom autobiography**

'Whom' is an object pronoun that refers to the person who was the recipient of an action. However, 'Whose' is a possessive pronoun that refers to the person to whom something belongs. Similarly, the given sentence refers to a Swami to whom the autobiography belongs. Hence, 'whose autobiography' is the most appropriate answer.

**Sol.546.(b) of the migrant worker**

**Solutions :-**

**Sol.617.(c) by ink**

There is a prepositional error in the given sentence. The preposition 'by' must be replaced with 'in' because we generally write 'in ink' for example fill the form in blue ink, sign the cheque in ink, etc. Similarly, in the given sentence, the documents need to be signed in ink. Hence, 'in ink' is the most appropriate structure.

**Sol.618.(b) daughter-in-laws**

We can never write 'in-laws' because adding 's' in the suffix(in-law) is wrong. However, we write daughter-in-law for a single female and daughters-in-law for more than two females. Similarly, the given sentence talks about two daughters-in-law. Hence, 'daughters-in-law' is the most appropriate structure.

**Sol.619.(a) suspect**

The phrase 'above suspicion' is used to describe someone who would never be suspected of doing anything wrong. Similarly, the given sentence states that his honesty and loyalty are above suspicion. Hence, 'suspicion' is the most appropriate structure.

**Sol.620.(a) elder than**

The comparative degree 'elder' will not be used with 'than' because it will become a case of superfluosness(not necessary). Hence, 'than' will be replaced with 'to' and 'elder to' is the most appropriate structure.

**Sol.621.(d) afraid from**

Afraid generally takes the preposition 'of' and not 'from'. Hence, 'afraid of' is the most appropriate structure.

**Sol.622.(b) an young businessman**

We use the article 'a' before the words starting with a Consonant(B,D,F,N,etc.) for example, a dirty shirt, a neglected department, etc. However, the article 'an' is used before words starting with a vowel (A,E,I,O,U) for example, an educated person, an imminent danger, etc. Hence, 'a young(Consonant 'y') businessman' is the most appropriate structure.

**Sol.623.(a) why his low score**

If an Interrogative sentence(in which a question is asked) is written in the Indirect form(speech), then "Wh-word(why, when, where) + Subject + Verb" is grammatically the correct structure for it. Hence, 'why his(subject) score was(verb) low' is the most appropriate structure.

**Sol.624.(a) only mistake**

The article 'the' is used to refer to specific or particular nouns & articles 'a/an' are used to modify non-specific or non-particular nouns. For example, if someone says, "Let's buy the book," it means a specific book but if someone says, "Let's buy a book," it means any book rather than a specific book. **Sol.625.(d) I am hearing**

Stative verbs are those verbs which express a state of condition. They do not refer to a physical action. Sense and emotions like hear, smell, see, love, hate etc are different types of stative verbs. However, these verbs can't be used in (-ing form) for example, Hear, Smell(Correct) and Hearing, Smelling(Incorrect). Hence, 'I hear a strange noise' will be the answer.

**Sol.626.(b) No error.**

The given sentence is grammatically correct.

**Sol.627.(b) so much to**

The phrase 'so much' is used to mention a definite unknown quantity and 'much' is used with uncountable nouns. However, when we ask about someone's earning, we usually ask how much you earn and not how 'so much' you earn. Hence, 'Do you earn much' will be the correct sentence structure.

**Sol.628.(b) although you**

It is a conditional sentence which has two conditions and starts with a negative sense(cannot). It says one cannot lead a healthy life, one does not quit smoking. Unless is a negative conditional conjunction which means 'If\_\_not' and it is used to combine these two conditions. Hence, Unless will replace although.

**Sol.629.(b) to steady itself**

According to the context of the sentence, the reflexive pronoun 'myself' will replace 'itself' because the subject(noun)/the narrator is a human being and for living things we use 'myself'. Hence, 'to steady myself' will be the correct sentence structure.

**Sol.630.(b) are from**

Jury/Team/Committee are considered as a singular subject and will take a singular verb, until they are divided in their opinion/views. For example, the Jury(Singular subject) has given its decision(United) , the committee(Plural subject) are divided in their opinion(Divided). Similarly in the given question, 'the jury is(singular verb) from different parts of the country' is the most appropriate structure.

**Sol.631.(b) stage artist**

With neither.....nor is used. Hence, Miss Marple is neither a good singer nor a good stage artist.This will be the correct sentence.

**Sol.632.(c) a best quality**

In the given sentence, the best(superlative) quality rice is mentioned and we can't use the article 'a' with a superlative degree. Hence, 'Rice of the best quality' is the most appropriate structure.

**Sol.633.(a) lie on the table**

Lying is a non-finite verb which is acting as an adjective for the books in the given sentence. Hence, 'Books lying on the table' will be the correct sentence structure.

**Sol.634.(d) dare not read**

Dare means to challenge someone for something. According to the context of the sentence, we have to show the inability of the person to see and for ability/inability, we will use 'can' and not dare. Hence, 'cannot read' will be the correct sentence structure.

**Solutions :-**

**Sol.227.(a) Preening its plumage and became motionless.**

Possessive form of the pronoun 'It' will be used i.e. 'Its' and  $V_2$  of 'become' will be used as the first clause of the sentence is in the past tense. Hence, 'Preening its plumage and became motionless.' is the most appropriate answer.

**Sol.228.(a) but they perceive the world differently.**

Conjunction 'but' will be used instead of 'although' as we generally use 'but' to connect ideas that contrast and adverb 'differently' will be used to describe the verb 'perceive'. Hence, 'but they perceive the world differently' is the most appropriate answer.

**Sol.229.(d) brake hard**

The correct sentence structure using Infinitive is 'To + Base Verb' (to eat, to go, to study). Hence, 'brake hard' is the most appropriate answer.

**Sol.230.(b) the same aisle as**

Article 'the' is used to refer to specific or particular nouns. Similarly, the given sentence talks about a specific noun (aisle). Hence, 'the same aisle as' is the most appropriate answer.

**Sol.231.(a) a great way to unite soldiers' skills and build**

We generally use article 'a' to refer to a nonspecific or general noun. Hence, 'a great way to unite soldiers' skills and build' is the most appropriate answer.

**Sol.232.(d) Gave the diners**

'Giving' will be replaced by 'gave' as we generally use past indefinite( $V_2$ ) to describe completed actions or events that occurred in the past. Hence, 'gave' is the most appropriate answer.

**Sol.233.(d) through a hole**

'With' must be replaced with 'through' as we generally use the preposition (through) indicating movement or passage from one side or location to another. Hence, 'through a hole' is the most appropriate answer.

**Sol.234.(a) like one of those unwelcome social summonses which call upon a man**

'Summons' must be replaced with 'Summonses' as we use plural nouns (summonses) with 'these/those'. Hence, 'like one of those unwelcome social summonses which call upon a man' is the most appropriate answer.

**Sol.235.(b) which is quite some**

'Which are a greater' must be replaced with 'which is quite some' in the given sentence. The word "which" refers to the distance of 12 kms, and the word "are" is plural because it agrees with the noun "distances". However, in this case, we are only talking about one distance, so the verb "is" will be used. The adverb "quite" is used to emphasise the distance, and the word "some" is used to indicate that the distance is significant. Hence, 'which is quite some' is the most appropriate answer.

**Sol.236.(a) that was beginning to affect her ability**

The word "that" is a relative pronoun that refers to the noun "preoccupation". The word "which" is also a relative pronoun, but it is used to refer to things, not actions. In this case, we are talking about the action of the preoccupation affecting her ability, so we need to use the word "that". Hence, 'that was beginning to affect her ability' is the most appropriate answer.

**Sol.237.(d) Elected by the**

'Electing by the' must be replaced with 'elected by the' in the given sentence. As we generally use past participles(elected) to denote the current state of a person or thing. Hence, 'elected by the' will be the most appropriate answer.

**Sol.238.(c) remained stationary**

'Was remain' must be replaced by 'remained' as the given sentence is in the simple past tense so the verb must be used in the simple past form(V2). However, the past form of 'remain' is 'remained'. Hence, 'remained stationary' is the most appropriate structure.

**Sol.239.(c) last seen in**

'Lastly' must be replaced with 'last' as we generally use last as an adverb to show the last occasion before the present and the given sentence is in passive voice so we the 3rd form of the verb(seen) will be used. Hence, 'last seen in' is the most appropriate answer.

**Sol.240.(c) has a broken**

'Have a broken' must be replaced with 'has a broken' in the given sentence. According to the subject-verb agreement singular subject always takes singular verb and plural subject always takes plural verb. Here the subject 'third stair' is a singular subject. Hence, 'has a broken' is the most appropriate answer.

**Sol.241.(c) standing between**

The given sentence is an example of the past continuous tense. The past continuous tense shows a continuous action that began in the past. The verb 'stand' is used to indicate a position, and the preposition 'between' is used to indicate the location of something in between two other things. Hence, 'standing between' is the most appropriate answer.

**Sol.242.(a) No improvement**

The sentence is grammatically correct.

To pore over means to read a document very carefully.

**Sol.243.(a) master's in developmental studies in the Netherlands.**

We generally use the definite article "the" with countries whose names are plural or collective nouns. For example, "the United States," "the Netherlands," "the Philippines," or "the Maldives." Hence, 'master's in developmental studies in the Netherlands' is the most appropriate answer.

**Sol.244.(d) No improvement**

The sentence is grammatically correct.

**Sol.245.(d) to be at war with its own people**

'Its' must be replaced with 'its' in the given sentence. The word 'its' is the possessive pronoun for the singular noun 'government'. Hence, 'To be at war with its own people' is the most appropriate answer.

**Sol.246.(b)****there was collusion between objectors, due to similarities**

The word "collusion" means "secret agreement or cooperation

especially for an illegal or harmful purpose." In this case, the objectors are cooperating with each other to send similar letters to the council. The word "between" is used to indicate that the collusion is between two or more parties. Hence, 'there was collusion between objectors, due to similarities' is the most appropriate answer.

**Sol.247.(d) Deliver government services**

'Delivered' must be replaced with 'deliver' as the correct sentence structure using Infinitive is 'To + Base Verb' (to eat, to go, to study). Hence, 'deliver government services' is the most appropriate answer.

**Sol.248.(a) Are more**

'Have being' must be replaced with 'are' as we generally use simple present tense (Sub + are + obj) to describe actions that are facts or generalizations. Hence, 'are more' is the most appropriate answer.

**Sol.249.(a) Sudden rush of understanding**

'Put off' must be replaced with 'rush of' as the phrase 'sudden rush of' means to do something quickly. Hence, 'Sudden rush of understanding' is the most appropriate answer.

**Sol.250.(c) In fact, climbing fern is spreading so rapidly that it's**

### Solutions :-

#### Sol.583.(b) Need I

"**Modal + Subject + V<sub>1</sub>(first form of the verb)**" is the correct grammatical structure for the given interrogative sentence. Hence, 'Need(modal) I(subject)' is the most appropriate answer.

#### Sol.584.(c) No improvement required.

The given sentence is grammatically correct.

#### Sol.585.(b) is broadcast

We can't make the past form of some verbs(forecast, cost, broadcast, etc) by simply adding 'ed' to them. It means the past form of these verbs remains the same as the present form like the past form of 'broadcast' is 'broadcast' and not broadcasted. However, we always use a singular verb after an uncountable noun(news). Hence, 'is broadcast' is the most appropriate answer.

#### Sol.586.(d) same book as

We generally use 'like' for giving examples of something. However, the phrase 'same as' means someone or something that is exactly like another thing. Similarly, the given sentence talks about a book that is exactly the same book that the teacher recommended. Hence, 'same book as' is the most appropriate answer.

#### Sol.587.(a) to a lot of trouble

The phrase 'put someone to trouble' means make somebody work extra and cause problems. Similarly in the given sentence, Megha's habit makes his colleagues do extra work and creates problems. Hence, 'to a lot of trouble' is the most appropriate answer.

#### Sol.588.(d) a fact

The 'fact' mentioned in the given sentence is non-specific and we generally use the definite article 'a' before any non-specific or non-particular noun. Hence, 'a fact' is the most appropriate answer.

#### Sol.589.(b) passed off

'Passed out' means to become unconscious for a short time & 'Passed off' means to evade or lightly dismiss an awkward remark. However, the given sentence states that the feeling of dejection was evaded or dismissed in a minute. Hence, 'passed off' is the most appropriate answer.

#### Sol.590.(b) No improvement required

The given sentence is grammatically correct.

#### Sol.591.(b) both cheap and durable

The phrase 'as well as' is incomplete in the given sentence and we are discussing two qualities (low price & durability) of the shoes. Hence, 'both' which means 'the one as well as the other' will be used for the two qualities & 'both cheap and durable' becomes the most appropriate answer.

#### Sol.592.(d) that he had

We generally use 'If' in a conditional sentence but the given

sentence is a general statement. However, we generally use 'that' to introduce the next clause in a general statement. Hence, we will replace 'if' with 'that' & 'that he had' becomes the most appropriate answer.

**Sol.593.(b) nearly three-fourths**

'Three-fourths + of + something' will be the correct grammatical structure for the given sentence. Hence, 'nearly three-fourths' is the most appropriate answer.

**Sol.594.(a) with the services**

There is a prepositional error in the given sentence. The preposition 'to' must be replaced with 'with' because 'dispense' generally takes the preposition 'with'. Hence, 'with the services' is the most appropriate answer.

**Sol.595.(d) from**

The preposition 'along' that means from one end to or towards the other end of something must be replaced with 'from'. However, 'From' also means showing that somebody/something is taken away, removed, or separated from somebody/something else. Similarly, the given sentence states that the toy is taken away from the child. Hence, 'from' is the most appropriate answer.

**Sol.596.(b) any further delay**

'Farther' means to a greater distance and 'Further' means to a greater degree. However, the phrase 'without any further delay' means to immediately do something. Hence, 'any further delay' is the most appropriate answer.

**Sol.597.(d) No improvement required.**

The given sentence is grammatically correct.

**Sol.598.(b) Such**

'Too' is used in the sentences with a negative sense. But, the given sentence has a positive sense as the movie was interesting. However, 'such' is used for emphasizing the degree of something like such a nice play, such a bad boy, etc. Hence, we will replace 'too' with 'such' to grammatically correct the sentence.

**Sol.599.(c) lying**

Lying is derived from the word lie. It means to be in a specific state or, remain, or be kept in a specified state like the bag was kept in a specified position in the sentence. However, the given sentence will have bare infinitive means without the preposition 'to'. Hence, 'lying' is the most appropriate answer.

**Sol.600.(c) have you solved**

According to the "Subject-Verb Agreement Rule", a singular subject always takes a singular verb and a plural subject always takes a plural verb. In the given sentence, 'Sums' is a plural subject that will take 'have' as a plural verb. However, "have + V<sub>3</sub>(the third form of the verb)" is the correct grammatical structure for the given sentence. Hence, 'have you solved(V<sub>3</sub>)' is the most appropriate answer.

**Sol.601.(c) No improvement required.**

The given sentence is grammatically correct.

A reflexive pronoun will be used which is in option (a). So, the correct answer is option (a).

**Solutions :-**

**Sol.749.(d) 'Quite a cheap'** must be used instead of 'quite the cheap'.

'Quite cheap' is a phrase which means that it is cheap to a great extent.

Use of 'quite a': 'Quite a few' - an indefinite and somewhat large number, more than a few but fewer than a lot, a fair number of. 'Quite a bit' - you have a lot of something. It can be used to say something is in greater quantity.

**Sol.750.(d) No improvement.**

The given sentence is grammatically correct.

**Sol.751.(b)** As the bank failure was an incident that took place in the past, so the past simple form of the verb(ruined) will be used in the given sentence. Therefore, use "were ruined" instead of "were ruining".

**Sol.752.(d)** Instead of 'is slept', 'was asleep' must be used.

When you use the past continuous with two actions in the same sentence, it expresses the idea that both actions were happening at the same time. The actions are parallel.

**Sol.753.(d)** Use of "for a long time now" indicates present perfect continuous tense (used for an activity starting in the past and still continuing). Therefore, we will use "have been asking him for a raise".

**Rule:** Sub + has/have + been + 1st form of verb + ing + obj

**Sol.754.(d)** Instead of "no other hobby but" use "No other hobby than" You use 'no other than' when you are going to mention a course of action, decision, or description and emphasize that it is the only one possible in the situation. (Here, she has only one hobby of collecting coins)

**Sol.755.(d) during a voyage across**

'voyage across' should be used in place of 'voyaging over'. We use 'across' as a preposition and an adverb. 'Across' means on the other side of something, or from one side to the other of something which has sides or limits such as a city, road or river.

**Sol.756.(d) that more people were likely**

Here, we are comparing the number of deaths occurring due to epidemics and tsunamis using 'than'. So, we will use a comparative degree(more). Hence, the use of "more people" instead of "even many people" is correct.

**Sol.757.(a) No improvement.**

The sentence is grammatically and contextually correct.

**Sol.758.(d)** Being polite and courteous- means having qualities of politeness and courteousness.

**Be polite and courteous** - is used when advising someone to be polite and courteous.

**Sol.759.(c) is like that of a rose**

'is like that of' should be used in place of 'is like a'.

Here, the colour of cheeks is similar to the colour of rose and not the rose itself.

During comparison using 'like' we compare noun with noun, verb with verb and adjective with adjective.

**Sol.760.(b) must be careful when crossing**

Use 'must be careful' as must is used for compulsion/fixed determination and duty. 'Must' is used to express obligation, give orders and give advice. In the given sentence an advice is given so "must" should be used here. Hence, option b is correct.

**Sol.761.(b)** Use 'two of my father's friends' as here the speaker met two people who were his father's friend. Hence, the noun used should be plural 'friends'.

### Solutions :-

**Sol.762.(b) fallen onto the stove**

" $V_1 / V_2 / V_3 / V_{ing} + \text{and} + V_1 / V_2 / V_3 / V_{ing}$ " is grammatically the correct structure which states 'and' is used to connect two same structures. It means tense or form of the verb before and after 'and' must be the same. Similarly in the given question,  $V_3$  (has boiled) has come before 'and' so  $V_3$  should also come after it. Hence, 'fallen( $V_3$ ) onto the stove' will be the most appropriate answer.

**Sol.763.(b)** 'Besides' means in addition to something and 'Beside' means near or next to somebody/something. In the given question, Dinesh requested the lady to give him a seat near the window. Hence, 'a seat beside the window' will be the most appropriate answer.

### Solutions :-

**Sol.766.(b) No improvement.**

The given sentence is grammatically correct.

**Sol.767.(b) No improvement.**

The given sentence is grammatically correct.

**Sol.768.(b)** The given sentence is in Future tense.

So, 'will have left' is correct.

The future perfect tense will be used here as we are talking about an event that will be over before a specific time in the future.

**Sol.769.(c)**

'Prefers to walk' should be used in place of 'preferring to walk'.

The latter part of the sentence includes 'everyday' which shows that it is an habitual action, so present simple tense should be used.

**Sol.770.(d)**

'Is not a better' should be replaced with 'is not a good'.

In the given sentence, no comparison is done.

So, positive degree 'good' should be used in place of a comparative degree 'better'.

**Sol.771.(c)**

'On its country' should be replaced with 'to their country'.

In this sentence, 'family' is a collective noun, but it will take the plural verb 'their' because the members of the family are acting as individuals.

**Sol.772.(a)** 'A good deal of' should be used in place of 'good deal'. A good deal of something means a large amount or quantity of something. In this sentence, he spends a large amount of money on clothing.

**Sol.773.(b)** 'carried around' should be replaced with 'carried out'.

Carried out - complete/accomplish the assignment.

Carried around - to physically carry someone or something to many places.

In this question, 'The soldiers complete the order of their commander without question'.

**Sol.774.(c)**

'to finish quickly' should be used in place of 'a quick finish'.

Comparison should be done with the same part of speech.

In this sentence; 'more important' is followed by 'to answer' (verb), 'than' must be followed by 'to finish' (verb).

**Sol.775.(a)** 'which meaning' should be replaced with 'the meaning of which'.

The given sentence is talking about the meaning of some words that means a relation is being shown between meaning and words. To show relation or possession the preposition 'of' is used. Therefore, 'the meanings of which' is the correct phrase to be used in the given sentence.

**Sol.776.(a) not to crack**

In negative sentences, 'not to' will be used.

The use of 'to not to' is incorrect in the given sentence.

'Not to' will be used in place of 'to not to' because the usage of 'to' before 'not to' will be superfluous (not necessary). Therefore, the correct sentence will be 'I request you not to crack jokes in the class'.

**Sol.777.(a) the young age of nine**

When 'age' is already mentioned, then there is no need to mention 'years'.

**Sol.778.(d)**

'Few people' should be used in place of 'little bit people'.

'Few' is used for countable nouns. 'Little' is used for uncountable nouns. In this sentence, 'people' is countable. So, we use 'few'.

**Sol.779.(a) 'prefer to remain'** should be used in place of 'preferable to remain'.

It's a fact that the masses, though well intentioned, prefer to be passive spectators.

**Sol.780.(a) 'To explain it to her'** should be used in place of 'for explain it her'.

'To explain' is a phrase. To explain - to make the meaning of something clear.

**Sol.781.(c) 'In a first floor'** should be replaced with 'on the first floor'. With floors, we use the preposition 'on'.

Eg - 'On' + 'the first floor/second floor/third floor etc'. But 'in' + 'the basement'.

**Sol.782.(d) 'access to'** should be used in place of 'accessing in'.

'Access to' is a phrasal verb which means 'the right or opportunity to use something'.

**Sol.783.(d) 'Shall most definitely'** should be used in place of 'can't most definitely'.

The phrase 'even if' used to express something will happen, would happen or would have happened in any case or condition. This conjunction emphasizes that a specific situation will continue no matter what happens. The first sentence is negative and the presence of 'Even' provides us with a hint that the latter part will be positive. Hence, option d is the correct answer.

**Sol.784.(d) 'Having grow old'** should be replaced with 'am growing older'. Present Continuous is used to express the idea that something is happening now, at this very moment.

However, the given sentence is in the simple present tense, so the former part which is in 'continuous tense' should also be in the simple present form.

**Sol.785.(d) No improvement.****Sol.786.(a) No improvement.****Sol.787.(b) 'will remain trapped'** should be used in place of 'will trapped'.

The given situation refers to the future & we never use  $V_3$  directly with 'will'.

Future Tense (Subject + shall/will +  $V_1$  + object / Subject + shall/will + not +  $V_1$  + object)

**Sol.788.(b) 'such as a poodle'** should be used.

'Such' is followed by 'as'.

'A dainty dog' has been used. So, a singular noun (poodle) will be used and not (poodles)

## SET-35. Q.(178 - 182)

Unemployment arises from a variety of \_\_\_\_\_ (178) One which is always recurring and the effects of which we have had a recent example, is the disorganisation of industry resulting from a long war; this is a serious, \_\_\_\_\_ (179) admitting of no easy \_\_\_\_\_ (180) at the best of times. Again there is the unemployment which followed a marked diminution in the \_\_\_\_\_ (181) of any raw product, such as cotton; fewer hands are required in the mills and the factories. Yet another cause is strike or lockout and this is more to be deplored because such a stoppage is due to a very trivial matter, perhaps the men are working half an hour longer than what their Union permits.

Seasonal winds are a natural phenomenon that (218)\_\_\_\_ weather patterns across the globe. The movement of air from high-pressure areas to low-pressure areas causes seasonal winds to form, and their direction and intensity (219)\_\_\_\_ depending on the region and season. One of the most significant seasonal winds is the monsoon, which affects large parts of South Asia during the summer months. This wind system brings much-needed rain to the region, but it can also cause flooding and landslides, leading to loss of life and property damage. Other seasonal winds include the harmattan in West Africa, which is a dry, dusty wind that blows from the Sahara Desert towards the Atlantic coast, and the mistral in southern France, which is a strong, cold wind that blows down the Rhone Valley towards the Mediterranean. Seasonal winds can have a significant (220)\_\_\_\_ on agriculture, particularly in regions where rainfall is limited. Primitive cultures are those that exist in societies that have not yet developed advanced technology or complex social (258) \_\_\_\_\_. The cornea, a transparent covering, and a spherical lens make up the eye's lens system, just like any other camera. The retina is a kind of 'reusable film'. This is the (328)\_\_\_\_\_ for images. The size of the opening, the shape of the lens and the movements of the eye are all controlled by various sets of muscles.

There are three things that happen when you look at an object:

  2. It is necessary to focus the scattered light at the retina's (329)\_\_\_\_\_.
  3. To match the retina's curve, the image must be curved.

The primary objective is to precisely focus the image on the retina, just like in an ordinary eye. The corneas of most people are either too long or too short. In the first scenario, corneal flattening is accomplished through laser eye surgery. The cornea is reshaped in the latter scenario by becoming rounder. Although the ATM concept was first (350)\_\_\_\_\_ in 1968, a functional prototype was constructed in 1969, and Docutel was granted a patent in 1973. A 'data terminal' is all an ATM is. Many of these terminals are connected to this host processor, which is spread out (351) \_\_\_\_\_ the city or country. Usually, the host processor belongs to the bank. If it is a dial-up device, it connects to the various terminals via a modem and telephone line. This line can only be used by you. It is always accessible to the boss-in-charge for his or her exclusive use. Since the 17th century, manure has been utilised in agriculture. In those days, they didn't know how plants got the (358) \_\_\_\_\_ they needed. However, it wasn't long before people began to notice that the grass, bushes and shrubs there were beginning to (359) \_\_\_\_\_. They came to the conclusion that the soil supplied the plants with the nutrients they needed, and that organic remains could aid in this process. Because manure is (360) \_\_\_\_\_ from animals and plants, it not only provides a wide range of plant nutrients but also improves the structure of the soil. Farmers gradually began using fertilisers as well because they understood that if their farmlands were treated in a similar manner, the growth of their crops would also improve. It bonds the soil particles together to form soil crumbs, which are necessary for cultivating soil. Additionally, the addition of manure to the soil aids in the prevention of soil erosion and the loss of plant nutrients during precipitation. Commercial fertilisers, in contrast to manure, are inorganic (361)\_\_\_\_\_ that do not alter the structure of the soil. Their function is to provide the sprouting plants with additional nutrients. A farmer ought to know when and how to apply a particular kind of fertiliser. When the plants require a particular nutrient the most, use it. ### SET-162

**Sol.822.(c) On**

We use the preposition 'on' when we have to refer to something that is placed on a surface like the ball is on the table, someone is sleeping on the bed etc. Similarly, we live on the surface of the earth. Hence, on is the most appropriate answer. Whereas, all the other options do not fit in the context of the statement.

**Sol.823.(c) Speed**

Whenever something/someone is in motion we use the terms speed/velocity to state how fast or slow it is moving for example the car is moving at a speed of 50km/hr, the aeroplane is flying at the speed of 500km/hr. Similarly in this passage, we are talking about the speed at which the earth revolves in the space. Hence, speed is the most appropriate answer. .

### SET - 1. Q.(1 - 4)

Taekwondo is a form of empty hand martial arts combat that requires the athlete to use all parts of the body in competition. Taekwondo is a self-defence discipline; the name is derived from the Korean words 'tae', meaning kick, 'kwon', a punch or other blow with the hand or fist, and 'do', which is a way or method of operation. Among the general public, taekwondo is distinguished from other martial arts by its high speed, sweeping kicks and emphatic punches. As with judo, taekwondo was developed as a sport that is also representative of a moral code, where principles of loyalty, faithfulness, respect, and the preservation of an indomitable spirit form a significant part of taekwondo training. Beginning in 1945, shortly after the end of World War II and Japanese Occupation, new martial arts schools called kwans opened in Seoul. These schools were established by Korean martial artists with backgrounds in Japanese and Chinese martial arts. At the time, indigenous disciplines (such as Taekkyeon) were being forgotten, due to years of decline and repression by the Japanese colonial government. The umbrella term traditional Taekwondo typically refers to the martial arts practiced by the kwans during the 1940s and 1950s, though in reality the term 'Taekwondo' had not yet been coined at that time, and indeed each kwan (school) was practicing its own unique style of the Korean art.

Leadership does not exist without followership. A leader has to be accepted by the group which the former is supposed to lead. To gain acceptability, the leader should cause an emotive impact on the group members. The strength of character exhibited by leaders makes them dear to their followers. A leader is one who effectively inspires followers to achieve worthwhile things. What character of the leader motivates the followers? It is not pomp and show, neither flattery nor sanctioning more incentives. Pomp and show creates a sense of awe and the leader is deified rather than emulated. Flattery is unrealistic and cannot serve as a long-term motivational tool. A leader's style should be one that can be emulated by all irrespective of cadre, class and calibre. In 1888, an Atlantic contributor made the case for a "science of names." "Parents are strangely careless and unscientific in giving names to children," the contributor complained. "They forget that not only from the social point of view it is very advantageous to have one's name remembered, but that from the business point of view notoriety is capital, and must be obtained by persistent and ingenious advertising." Indeed, the contributor argued, a good name will give a child "a start in life equivalent to a cash capital of at least fifteen thousand dollars." One way to ensure this head start? "Be guided by euphonic quality only."

## SET - 4. Q.(13 - 17)

A fact that draws our attention is that, according to his position in life, an extravagant man is either admired or loathed. A successful business man does nothing to increase his popularity by being prudent with his money. A person who is wealthy is expected to lead a luxurious life and to be lavish with his hospitality. If he is not so, he is considered mean, and his reputation in business may even suffer in consequence. The paradox remains that he had not been careful with his money in the first place; he would never have achieved his present wealth. Among the low income group, a different set of values exists. The young clerk, who makes his wife a present of a new dress when he has not paid his house rent, is condemned as extravagant. Carefulness with money to the point of meanness is applauded as a virtue.

Nothing in his life is considered more worthy than paying his bills. The ideal wife for such a man separates her housekeeping money into joyless little piles – so much for rent, for food, for the children's shoes, she is able to face the milkman with equanimity every month, satisfied with her economizing ways, and never knows the guilt of buying something she can't really afford. As for myself, I fall into neither of these categories. If I have money to spare I can be extravagant, but when, as is usually the case, I am hard up and then I am the meanest man imaginable.

SSC CPO Tier II (08/01/2024)

**Q.13.** Which of these is NOT true?

- (a) A low-income person is considered worthy if he pays bills on time.
- (b) The rich amass wealth by spending money economically.
- (c) The author is at liberty to be extravagant at all times.
- (d) People who lead a luxurious life are expected to entertain Lavishly.

**Q.14.** Which of these can be inferred from the passage?

- (a) Wealthy people are stingy as far as philanthropy is concerned.
- (b) Extravagance is applauded in some and condemned in others.

## SET - 5. Q.(18 - 22)

Academics has always been an essential part of human development. It prepares us to survive in the outside world and

establish an identity of our own. In India, from an early age we have been taught that education is limited to the boundaries of academics only; the idea of getting out into the field, for gaining practical experience is always considered a hoax. This has hindered students' development.

In the 21st century, the pure academic type of education is slowly paving way for a whole new type. The shift in the whole education system is evident. People have now come to understand that education should focus on students' overall development, rather than restricting him/her to the classroom.

Co-curricular activities that take place outside the classroom help in the growth of the child, in more than one way. Participating in such activities helps youngsters grow mentally, socially and individually. Intellectual development of a student takes place in the classroom, but for the aesthetic development such as team-building, character-building and physical growth, students must step out into the outside world.

Similarly, in colleges and institutions, there is a need for practical exposure so that the students can experience the actual working of an industry. Most professional colleges including B-schools, have started providing practical exposure to students through regular guest lectures, industrial visits, conferences and so on. Guest lectures are very important for all-round development of students as guest speakers talk about their real-life experiences and not what is there in the text books.

Through such events students are made to participate and coordinate different events wherein, they get to know how exactly things are managed. Classroom teaching provides the foundation, and co-curricular or extra-curricular activities provide practical exposure and opportunities to implement what students learn in the classroom. This helps in developing the overall personality of the students, inculcating various soft-skills in them, which otherwise are difficult to teach.

SSC CPO Tier II (08/01/2024)

**Q.18.** Which of these does NOT provide industry exposure to students of business schools?

**SET - 6. Q.(23 - 27)**

In the pre-dawn tranquillity of the Andaman Sea, a seismic tremor struck, momentarily agitating the ocean's placid surface. The Andaman and Nicobar Islands, an archipelago in the Bay of Bengal, felt the earth beneath them shudder at 5:50 a.m. on

Friday. According to the National Centre for Seismology (NCS), a 4.2 magnitude earthquake occurred at a depth of 10km, its epicentre originating from a seismically active region beneath the sea. No casualties or damages have been reported.

Earthquakes, like the one experienced in the Andaman Sea, are stark reminders of the Earth's ever-shifting tectonic plates. These seismic events result from the sudden release of energy in the Earth's crust, creating seismic waves that cause the ground to shake. The intensity and impact of an earthquake depends on various factors, including its magnitude, depth, and proximity to populated areas. The Andaman and Nicobar Islands are located in a region where several tectonic plates converge, including the Indian Plate, the Burma Plate, and the Sunda Plate. The interaction of these plates leads to frequent earthquakes and volcanic activity. With its 4.2 magnitude, the recent earthquake is considered moderate, but its occurrence in this seismically active region serves as a reminder of the unpredictable and potentially devastating nature of such events.

The NCS, the nodal agency of the Government of India, is responsible for monitoring earthquake activity in the country. Using a network of seismographs, the NCS collects and analyses data from seismic events to provide accurate information to the public and relevant authorities. This data helps scientists understand patterns and trends, leading to a better understanding of earthquake behaviour and potential risks. Earlier this week, Maharashtra's Satara district was also shaken by a 3.3 magnitude earthquake. While these events seem isolated, they form part of a broader pattern of seismic activity across the region. The Andaman and Nicobar Islands have experienced several significant earthquakes in the past, including a 5.8 magnitude earthquake in 2021. The potential consequences of earthquakes can be devastating, causing loss of life and extensive damage to infrastructure. It is therefore vital to have effective early warning systems and disaster management strategies in place.

While the 4.2 magnitude earthquake in the Andaman Sea did not result in any casualties or damages, it underscores the importance of continued investment in earthquake preparedness and resilience measures, particularly in seismically active regions like the Andaman and Nicobar Islands.

**SET - 7. Q.(28 - 32)**

The regal period (753–509 BC) and the early republic (509–280 BC) are the most poorly documented periods of Roman history because historical accounts of Rome were not written until much later. Greek historians did not take serious notice of Rome until the Pyrrhic War (280–275 BC), when Rome was completing its conquest of Italy and was fighting against the Greek city of Tarentum in southern Italy. Rome's first native historian, a senator named Quintus Fabius Pictor, lived and wrote even later, during the Second Punic War (218–201 BC). Thus historical writing at Rome did not begin until after Rome had completed its conquest of Italy, had emerged as a major power of the ancient world, and was engaged in a titanic struggle with Carthage for control of the western Mediterranean. Fabius Pictor's history, which began with the city's mythical Trojan ancestry and narrated events up to his own day, established the form of subsequent histories of Rome. During the last 200 years BC, 16 other Romans wrote similarly inclusive narratives. All these works are now collectively termed "the Roman annalistic tradition" because many of them attempted to give a year-by-year (or annalistic) account of Roman affairs for the republic.

Although none of these histories are fully preserved, the first 10 books of Livy, one of Rome's greatest historians, are extant and cover Roman affairs from earliest times to the year 293 BC (extant are also Books 21 to 45 treating the events from 218 BC to 167 BC). Since Livy wrote during the reign of the emperor Augustus (27 BC–AD 14), he was separated by 200 years from Fabius Pictor, who, in turn, had lived long after many of the events his history described. Thus, in writing about early Rome, ancient historians were confronted with great difficulties in ascertaining the truth. They possessed a list of annual magistrates from the beginning of the republic onward (the consular fasti), which formed the chronological framework of their accounts. Religious records and the texts of some laws and treaties provided a bare outline of major events. Ancient historians fleshed out this meagre factual material with both native and Greek folklore. Consequently, over time, historical facts about early Rome often suffered from patriotic or face-saving reinterpretations involving exaggeration of the truth, suppression of embarrassing facts, and invention.

On woody plants known as vines, luscious, smooth-skinned berries called grapes grow in dense clusters. In particular,

grapes are grown in France, Italy, Spain, Australia, Chile, Romania, Georgia, South Africa and California, all of which have warm summers and moderate winters. Table grapes are larger and sweeter grapes that are intended for fresh consumption. To create wine, 80% of the grapes are crushed. The fermentation process turns grapes into wine. To make raisins, grapes must also be dried.

Grapes ripen in the area of California in August. They are cut from the vines and left on trays to dry for two to three weeks. So, to transform them into raisins, they are further cooked and steeped in particular treatments. According to studies, one acre of grapes can make roughly 15,000 glasses of wine on average. Grapes of the Thompson, Flame, Ruby, Perlette and Tokay varieties are popular.

Throughout history, the intricacies of the human mind have been the subject of fascination and inquiry. From ancient philosophers to modern-day neuroscientists, the workings of the brain have been studied and analysed in an attempt to unravel its mysteries. However, despite centuries of research, much remains unknown about the complexities of human cognition and consciousness. One of the most fascinating aspects of the human mind is its ability to create and imagine. The human mind has the capacity to conceptualise and bring into being ideas that were previously unknown or unimaginable, from artistic expression to scientific discovery. The process of creativity has captured the attention of scholars and laypeople alike and is both enigmatic and awe-inspiring.

There have been many theories proposed to explain the process of creativity. Some suggest that it is a purely subconscious process, while others argue that creativity is a result of conscious effort and intentional problem-solving. Still others suggest that creativity arises from a combination of conscious and subconscious processes. Despite the ongoing debate over the nature of creativity, one thing is clear: it is a multifaceted and complex phenomenon. Creativity can manifest in a wide range of human activities, from the creation of art and literature to the development of scientific theories and inventions. It can occur in both individual and collective contexts and can be driven by a variety of factors such as curiosity, passion, or the desire for recognition.

Creativity also has the potential to bring about positive change in the world. Throughout history, creative individuals and groups have used their talents to address social, political, and environmental challenges, often inspiring others to take action and make a difference. From the abolitionist movement to the civil rights movement to the environmental movement, creativity has played a crucial role in promoting social justice and positive change.

Despite the many benefits of creativity, it is not without its challenges. The process of creative expression can be fraught with obstacles, from self-doubt and insecurity to external pressures and constraints. Moreover, not all creative ideas are successful or well-received, and many artists and innovators face rejection and criticism as they seek to bring their ideas to fruition. Despite these challenges, however, the human drive to create and imagine persists. Individuals and groups continue to harness the power of creativity to make a difference in the world. From the humblest amateur artist to the most celebrated innovator, the human capacity for creativity remains one of our greatest strengths and sources of inspiration.

**SET - 12. Q.(51 - 55)**

As a society, we have come a long way in terms of progress and development. We have eradicated diseases, explored space, and created technological wonders that were once thought impossible. Yet, there is still one issue that continues to plague us: stupidity. Yes, stupidity. The thing that seems to be contagious and has been spreading faster than the common cold. It's everywhere you look - on social media, in politics, in the workplace. You can't escape it.

It's as if we've all collectively decided that intelligence and common sense are no longer important. Why bother using your brain when you can just rely on your gut feelings and conspiracy theories?

Take politics, for example. It used to be that politicians were expected to be knowledgeable and well-informed about the issues they were dealing with. Now, it seems that all you need is a catchy slogan and some empty promises to win an election.

And don't even get me started on social media. It's a breeding ground for stupidity. People will believe anything they read as long as it confirms their preconceived biases. And don't even think about trying to present them with actual facts and evidence. That's just a waste of time.

But it's not just individuals who are to blame for this epidemic of stupidity. Our education system is failing us as well. We're teaching our kids how to pass tests instead of how to think critically and solve problems. It's no wonder we have a generation of adults who can't even find their way around a basic math problem.

Of course, there are some who would argue that stupidity is just a different way of thinking. That it's a valid perspective that deserves to be respected. To those people, I say this: if you want to be stupid, go ahead. Just don't expect the rest of us to respect your opinions when they're based on nothing but ignorance and misinformation.

It's time for us to take a stand against stupidity. We need to start valuing intelligence and critical thinking again. We need to hold our leaders accountable for their actions and demand that they be knowledgeable and well-informed. We need to teach our children how to think, not just how to memorise.

It won't be easy, but it's a fight worth fighting. Because if we don't, we'll be stuck in a world where stupidity reigns supreme, and there's no telling what kind of damage that could do. So let's all do our part and start using our brains again. It's time to put an end to the epidemic of stupidity once and for all.

### SET - 13. Q.(56 - 60)

What if globally designed products could radically change how we work, produce and consume? Several examples across continents show the way we are producing and consuming goods could be improved by relying on globally shared digital resources, such as design, knowledge and software.

Imagine a prosthetic hand designed by geographically dispersed communities of scientists, designers and enthusiasts in a collaborative manner via the web. All knowledge and software related to the hand is shared globally as a digital commons.

People from all over the world who are connected online and have access to local manufacturing machines (from 3D printing and CNC machines to low-tech crafts and tools) can, ideally with the help of an expert, manufacture a customised hand. This is the case of the Open Bionics project, which produces designs for robotic and bionic devices.

There are no patent costs to pay for. Less transportation of materials is needed, since a considerable part of the manufacturing takes place locally; maintenance is easier, products are designed to last as long as possible, and costs are thus much lower.

### SET - 14. Q.(61 - 65)

The world of social media is a strange and wondrous place. It's a world where you can connect with people from all over the globe, share your thoughts and opinions, and maybe even go viral if you're lucky. But let's be real, it's also a world filled with endless cat videos, oversharing, and drama.

One of the most interesting things about social media is the way it's changed the way we communicate. We've gone from long, thoughtful emails to quick, abbreviated messages with emojis and acronyms. And don't even get me started on the whole hashtag phenomenon. It's like we're all speaking a different language now.

But there are also some downsides to this constant connection. It's easy to get sucked into the world of social media and forget about the real world around us. We're so busy scrolling through our feeds that we forget to enjoy the little moments in life. And let's not forget about the pressure to present the perfect life online. It's like we're all in a competition to see who can be the most popular, the most successful, the most enviable.

Despite all of this, I have to admit, I'm still a fan of social media. It's a great way to stay connected with friends and family, and I've even made some new friends through various online communities. Plus, let's face it, sometimes you just need a good laugh at a ridiculous meme.

### SET - 15. Q.(66 - 70)

The rise of social media has undoubtedly changed the way we communicate with one another. It has connected people from all over the world and provided a platform for voices that were once silenced. However, as with any form of communication, social media has its downsides.

One of the most significant downsides is the spread of misinformation. With the rise of social media, anyone can become a content creator, which means that anyone can share

information without fact-checking or considering the consequences. This has led to a proliferation of false information, from conspiracy theories to hoaxes, that can quickly spread and cause harm.

One recent example of this is the COVID-19 pandemic. Social media has played a significant role in the spread of misinformation about the virus and the vaccines. False claims about the safety and effectiveness of the vaccines have caused many people to be hesitant or outright refuse to get vaccinated. This, in turn, has led to the prolongation of the pandemic and the loss of many lives. The spread of misinformation on social media is not a new phenomenon. In fact, it has been around for centuries. However, the speed and ease with which misinformation can spread on social media have made it a particularly pernicious problem in our modern world.

Throughout history, misinformation has been used to sow discord and manipulate people. For example, during World War II, the Nazi regime used propaganda to spread false information about Jews, Roma, and other targeted groups in order to justify their persecution and ultimately their extermination. Similarly, during the Cold War, both the United States and the Soviet Union used propaganda to demonise one another and sway public opinion.

The difference now is that social media has made it easier than ever to spread false information. A single post or tweet can reach millions of people within seconds, and it can be difficult to counteract the effects of that misinformation once it has spread. So, what can we do about it? The answer is not simple, but it starts with education. We need to teach people how to think critically, how to fact-check, and how to discern between credible sources and fake news. We also need to hold social media companies accountable for the content on their platforms and ensure that they are doing their part to combat the spread of misinformation. In short, the rise of social media has given us a powerful tool for communication, but we must use it wisely. We must be vigilant against the spread of misinformation and work together to ensure that the information we consume and share is accurate and reliable.

#### SET - 16. Q.(71 - 75)

Mountains occupy about a quarter of the Earth's land, harbour most of its biodiversity hotspots and supply fresh water to an estimated half of humanity. Present on every continent, mountains include a multitude of ecosystems holding many unique species such as snow leopards and mountain gorillas. They are also home to great cultural diversity among people adapted to the challenges of mountain life. Their special traditions and breath-taking scenery attract ever-growing numbers of tourists. Mountain regions are particularly sensitive to degradation from both human pressures and climate change. Steep slopes mean the clearing of forest for farming, settlements or infrastructure can cause serious soil erosion as well as the loss of habitat. Erosion and pollution harm the quality of water flowing downstream. Climate change threatens the quantity and timing of water supplies to farms, cities, industry and power stations. Fast-rising temperatures are forcing mountain species, ecosystems and the people that depend on them to adapt or migrate.

### SET - 17. Q.(76 - 80)

Such examples of commercial success, of innovation, drive, vision, determination, adaptability, and adventure are anchored in the basic Indian openness to, and talent for, acquiring material wealth. For every success story there are, of course, dozens of failures. Traditional Indian firms have their strengths, but also their weaknesses, and of these perhaps the most debilitating are a lack of team work and a weakness for quick profit. These reflect ingrained ways of thinking and planning, as does the

distrust of anyone outside the family, which inhibits the adoption of modern practices of management. But such weaknesses are more than compensated for by the desire to succeed, which is probably more intense in India, given the omnipresent fear of poverty, the cut-throat competition for each opportunity, and the asphyxiating hold of hierarchy.

### SET - 18. Q.(81 - 85)

When the dance had finished, Odysseus stood, his voice raised for all to hear. "We are truly honoured by your performance; not everyone can say that they have seen the dancers of Scyros. As tokens of our admiration we have brought gifts for you and your king." A murmur of excitement. Luxuries did not come often to Scyros; no one here had the money to buy them.

"You are too kind." Lycomedes' face was flushed with genuine pleasure; he had not expected this generosity. The servants brought trunks forth at Odysseus' signal and began unloading them on the long tables. I saw the glitter of silver, the shine of glass and gems. All of us, men and women both, leaned towards them, eager to see.

'Please, take what you like,' Odysseus said. The girls moved swiftly to the tables, and I watched them fingering the bright trinkets: perfumes in delicate glass bottles stoppered with a bit of wax; mirrors with carved ivory for handles; bracelets of twisted gold; ribbons, dyed deep in purples and reds. Among these were a few things I assumed were meant for Lycomedes and his counsellors: leather-bound shields, carved spear hafts, and silvered swords with supple kidskin sheathes. Lycomedes' eyes had caught on one of these, like a fish snagged by a line.

Odysseus stood near, presiding benevolently.

Achilles kept to the back, drifting slowly along the table. He paused to dab some perfume on his slender wrists, stroke the smooth handle of a mirror. He lingered a moment over a pair of earrings, blue stones set in silver wire.

A movement at the far end of the hall caught my eye. Diomedes had crossed the chamber and was speaking with one of his servants, who nodded and left through the large double doors. Whatever it was could not be important; Diomedes seemed half-asleep, his eyes heavy-lidded and bored.

I looked back to Achilles. He was holding the earrings up to his ears now, turning them this way and that, pursing his lips, playing at girlishness. It amused him, and the corner of his mouth curved up. His eyes flicked around the hall, catching for a moment on my face. I could not help myself. I smiled.

### SET - 19. Q.(86 - 90)

Time is the essence of life. It is the wealth given to us by God. Everyday all of us get 24 hours; nothing less, nothing more. Now, it is up to us how we use it. People who know how to make the best use of every moment easily open the doors of success in their lives and those who misuse time get failures one after the other. There is a saying that, "Spent time and spent words cannot come back." Everybody is tied by the limits of time. Work wins appreciation only when it gets completed in a requisite time frame. Beyond the time allotted, work loses all its utility, however good may have been its quality. Just as falling of rains after the crops have dried up have no use; likewise, when the time is past the deadline, the work loses its importance and value. When iron is hot it can be cast into whichever shape we want. Once it gets cold nothing can be made out of it, however much we may beat the same. In the same way, a person who has learnt to wisely use his time and has understood how to cast himself according to the need of the time has actually learnt the true mantra of life. Shakespeare wrote in one of his plays, "I wasted time, and now doth time waste me." It is true that a person who wastes even a little bit of time loses wonderful opportunities that he could have otherwise availed of by utilising that time. All the great leaders have one thing in common. They wisely utilise every moment of their time. When other people are busy in wasting time in laziness, great men are busy in making plans for the future. There is no person in history who wasted his time and still

managed to achieve greatness. Therefore, there is great need to manage time wisely. "Careful Time Management" refers to careful planning of time and sincere execution of this plan. This is the only mantra to attain success in any endeavour. A simple change in outlook and some modification in one's daily routine can result in a big jump forward towards greater achievements.

In their highest boughs the world rustles, their roots rest in infinity; but they do not lose themselves there, they struggle with all the force of their lives for one thing only: to fulfil themselves according to their own laws, to build up their own form, to represent themselves. Nothing is holier, nothing is more exemplary than a beautiful, strong tree. When a tree is cut down and reveals its naked death-wound to the sun, one can read its whole history in the luminous, inscribed disk of its trunk: in the rings of its years, its scars, all the struggle, all the suffering, all the sickness, all the happiness and prosperity stand truly written, the narrow years and the luxurious years, the attacks withstood, the storms endured. #### SET - 21. Q.(96 - 100)

A sparrow is a small bird which is found throughout the world. There are many different species of sparrows. Sparrows are only about four to six inches in length. Many people appreciate their beautiful song. Sparrows prefer to build their nests in low places, usually on the ground, clumps of grass, low trees and low bushes. In cities they build their nests in building nooks or holes. They rarely build their nests in high places. They build their nests out of twigs, grasses and plant fibres. Their nests are usually small and well-built structures. Female sparrows lay four to six eggs at a time. The eggs are white with reddish brown spots. They hatch between eleven to fourteen days. Both the male and female parents care for the young. Insects are fed to the young after hatching. The large feet of the sparrows are used for scratching seeds. Adult sparrows mainly eat seeds. Sparrows can be found almost everywhere, where there are humans. Many people throughout the world enjoy these delightful birds.

The sparrows are some of the few birds that engage in dust bathing. Sparrows first scratch a hole in the ground with their feet, then lie in it and fling dirt or sand over their bodies with flicks of their wings. They also bathe in water, or in dry or melting snow. Water bathing is similar to dust bathing, with the sparrow standing in shallow water and flicking water over its back with its wings, also ducking its head under the water. Both activities are social, with up to a hundred birds participating at once, and is followed by preening and sometimes group singing.

Sparrows are little birds that can be found all throughout the world. Sparrows come in a wide variety of varieties. The length of a sparrow ranges from four to six inches. Their wonderful melody is well-liked and appreciated by a large number of people. On the ground, grass, low trees and bushes are all good sites for sparrows to make their homes. They nest in the cracks and crevices of buildings in urban areas. Nests are rarely constructed at great heights. Nests are constructed from twigs, grasses and other plant fibres. Their nests are usually modest, but well-built. Four to six eggs are laid by female sparrows at a time. Reddish brown blotches appear on the eggs' white shells. Between eleven and fourteen days, they'll hatch. The young are taken care of by both, male and female parents. After hatching, the young are fed insects. Using their big feet, sparrows scrape seeds. Seeds are the primary food source for adult sparrows. Birds like sparrows can be found nearly anywhere there are people. These lovely birds are beloved by a large number of people all around the world.

When it comes to nutrition, 'power foods' are those with a high concentration of nutrients, such fibre and potassium. A growing number of fitness trainers advise their customers to include these items in their regular diets in order to boost muscle growth. Power foods can be incorporated into your diet in a variety of ways. Of course, careful preparation, the use of season-fresh items and identifying your preferred flavour among power meals are the keys to enjoying these dishes.

Even if you're not a gourmet cook, you may find some of the best power food combos in your own pantry. Onions and chickpeas are an excellent pairing. In order for the body to deliver oxygen to all of its numerous parts, it needs iron. The symptoms of an iron deficiency include anaemia, fatigue, mental fog and exhaustion. Bananas and yoghurt are another popular power food pairing. After a long football game, this is the ideal post-game snack. Exercising reduces blood sugar by reducing the amount of glucose in the bloodstream. Yoghurt is rich in protein and bananas are rich in carbohydrates, both of which aid in refuelling and preventing muscular stiffness after a workout.

Green tea is the best source of catechins, antioxidants that can protect cells from oxidative damage, in the beverage market. Adding a squeeze of lemon to green tea, say Purdue

University researchers, increases the body's ability to absorb catechins. So, the next time you have friends around, serve them iced green tea with mint and lemon juice in pitcher.

Fine motor skills development allows children to execute vital tasks such as feeding themselves, writing, zipping their garments, and more. Small muscles that govern the hand, fingers, and thumbs are used in fine motor activity. Fine motor abilities assist youngsters in doing crucial tasks such as self-feeding, handling objects, and writing. The capacity to do self-care and everyday chores utilising fine motor skills promotes the development of a child's self-esteem and confidence.

Fine motor skills develop systematically in children. Most new-borns have a reflexive grip at birth and begin to reach for items about three months of age. They will also begin to practise their voluntary grip and two-handed palmar grasps. At 5 months, they should be able to demonstrate a one-handed palmar grip, and at 6 months, they should be able to create a controlled reach. Most new-borns begin to reach and grab for items to put in their mouth between the ages of 6 and 12 months, and they begin to gain the capacity to regulate the release of objects they are gripping. They will also develop a pincer grasp and use it to pick objects up (thumb and one finger). They will also be able to move an object from one hand to the other and drop and pick up their toys.

Most youngsters are interested in stacking building blocks between the ages of 12 and 24 months. They will also practice putting rings on a stick, putting pegs on a pegboard, and turning pages a few at a time. They can also begin to draw, paint with their entire arm movement, moving their hands and producing strokes, and feed themselves with little to no help.

Toddlers at the age of two can begin to string big beads, turn single pages, cut with scissors, and handle crayons with their thumb and fingers (instead of their fist). They will also be able to use only one hand for most tasks and begin to paint with their wrists, forming dots, lines, and circular strokes. Your youngster will also be able to eat consistently and without help.

Most youngsters will be able to cut along the dotted lines on paper by the age of four. They will be able to draw a cross or square shape and write their name and the numbers 1 to 5. They will be able to copy letters and will have mastered their handedness. They will also be able to dress themselves for the first time.

We sit in the last row, bumped about but free of stares. The bus rolls out of the dull crossroads of the city, and we are soon in the open countryside, with fields of sunflowers as far as the eye can see, their heads all facing us. Where there is no water, the land reverts to the desert. While still on level ground, we see in the distance the tall range of the Mount Bogda, abrupt like a shining prism laid horizontally on the desert surface. It is over 5,000 metres high, and the peaks are under permanent snow, in

powerful contrast to the flat desert all around. Heaven lake lies part of the way up this range, about 2,000 metres above sea level, at the foot of one of the highest snow-peaks.

As the bus climbs, the sky, brilliant before, grows overcast. I have brought nothing warm to wear. It is all down at the hotel in Urumqi. Rain begins to fall. The man behind me is eating overpoweringly smelly goat's cheese. The bus window leaks inhospitably but reveals a beautiful view. We have passed quickly from the desert through arable land to pasture and the ground is now green with grass, the slopes dark with pine. A few cattle drink at a clear stream flowing past moss-covered stones; it is a Constable landscape. The stream changes into a white torrent, and as we climb higher I wish more and more that I had brought with me something warmer than the pair of shorts that have served me so well in the desert. The stream (which, we are told, rises in Heaven Lake) disappears, and we continue our slow ascent. About noon, we arrive at Heaven Lake, and look for a place to stay at the foot, which is the resort area. We get a room in a small cottage, and I am happy to note that there are thick quilts on the bed.

Standing outside the cottage, we survey our surroundings. Heaven Lake is long, sardine-shaped and fed by snowmelt from a stream at its head. The lake is an intense blue, surrounded on all sides by green mountain walls, dotted with distant sheep. At the head of the lake, beyond the delta of the inflowing stream, is a massive snow-capped peak which dominates the vista; it is part of a series of peaks that culminate, a little out of view, in Mount Bogda itself.

For those who live in the resort, there is a small mess-hall by the shore. We eat here sometimes, and sometimes buy food from the vendors outside, who sell kabab and naan until the last buses leave. The kababs, cooked on skewers over charcoal braziers, are particularly good: highly spiced and well-done. Horse's milk is available too from the local Kazakh herdsman, but I decline this. I am so affected by the cold that Mr. Cao, the relaxed young man who runs the mess, lends me a spare pair of trousers, several sizes too large but more than comfortable. Once I am warm again, I feel a pre-dinner spurt of energy—dinner will be long in coming—and I ask him whether the lake is good for swimming in.

From January 28 to February 4, 2023, a Chinese-operated, large white high-altitude balloon was seen in North American airspace, including Alaska, western Canada, and the contiguous United States. The American and Canadian militaries asserted that the balloon was for surveillance, while the Chinese government maintained it was a civilian meteorological research airship that had been blown off course. Analysts said that the balloon's flight path and structural characteristics made it dissimilar from those

which have typically been used for meteorological research. The U.S. Department of State said that the balloon was capable of locating electronic communication devices, including mobile phones and radios, and that American U-2 reconnaissance aircraft deployed to track the balloon in the air revealed that the balloon carried antennas and other equipment "clearly for intelligence surveillance and inconsistent with the equipment on board weather balloons." The State Department said that the spy balloon was part of a global Chinese military-directed surveillance effort in which Chinese spy balloons have flown over more than 40 nations in five continents.

On February 4, the U.S. Air Force shot down the balloon over U.S. territorial waters off the coast of South Carolina, on the order of U.S. President Joe Biden. Debris from the wreckage was recovered and sent to the FBI Laboratory in Quantico, Virginia, for analysis.

The incident increased U.S.-China tensions. The incident prompted U.S. Secretary of State Antony Blinken to delay a diplomatic visit to Beijing, which was set to be his first since 2018. It also further strained Canada-China relations, as Canada summoned the Chinese ambassador because of the violation of Canadian airspace. On February 3, the U.S. Department of Defense announced that a second Chinese balloon was passing over Latin America, which China also said belonged to it. On February 10, the Air Force shot down another aerial object over U.S. territory at the order of President Biden.

Amidst a maze of rocks tucked in the Aravalli mountain ranges of Haryana, a team of archaeologists discovered cave paintings they believe belong to the Upper Palaeolithic age. The cave paintings have been discovered just outside the national capital and a stone's throw away from a holy grove called Mangar Bani—the region's only surviving patch of primary forest.

While the residents of the villages have been familiar with the paintings for ages, the Haryana government's museum and archaeology department took note of them just recently.

A fact-finding team was sent to the area in the last week of June. The team came across cave paintings comprising images of human figurines, animals, foliage, and geometric drawings. While some have faded over time, others are still very visible. They also discovered rock art and open-air ceremonial sites.

Banani Bhattacharyya, deputy director of the department of archaeology and museums informed, "So far, cave paintings in Delhi-NCR have only been found here. The paintings are yet to be dated but at least some of them belong to the Upper Palaeolithic period in all likelihood. We are viewing the paintings in continuation with the Soanian culture which has been found in Shivalik hills, Narmada and Aravallis."

Most of the cave paintings found were in ochre colour, but some were in white. As per experts, cave paintings in white are usually from a later stage (early contemporary era), while Stone Age paintings are more often than not in ochre. "Stone age paintings generally use red and ochre colours. Stones of these colour used to be available locally and inhabitants crushed the stones for preparing the colour for paintings," added Bhattacharyya.

The Upper Paleolithic Age began around 40,000 years ago and lasted till around 10,000 years ago. While yet to be established through archaeological dating, Bhattacharyya says the Mangar cave art is 20,000-40,000 years old. Bhattacharyya claimed that the discovery is extremely significant. "Starting from the Lower Palaeolithic to Middle Palaeolithic then Upper Palaeolithic, we see the evolution here. We have found significant remains from Lower Palaeolithic till Middle and Upper Palaeolithic period too," she explained. "Though tools from the Palaeolithic Age have been identified earlier in parts of the Aravallis, it is for the first time that cave paintings and rock art of a large magnitude have been found in Haryana," she added.

The sage of science, Einstein, was sitting in a depressive and pensive mood one evening. His eyes were brimming with tears. The pain was evident on his face. He peeped out of the window of his room. The sun had set a few minutes back. The sky was filled with a reddish glow. At this sunset, he felt that it was humanity that had sunk into devilish darkness and the reddish

glow in the sky was the blood of humanity spilling all over the sky from earth. With tired steps, he walked back to his chair and settled down. It was the 9th of August 1945. Three days back, he had felt the same agony as if someone had torn him apart. He was deeply hurt and depressed when he heard on the radio that America had dropped an atom bomb on the Japanese city, Hiroshima. Today, within three days another bomb was dropped on another city, Nagasaki and lakhs of people had been killed. He had heard that the blast released so much energy that it had paled all past destructions in comparison and death had played out a pitiable dance of destruction. The flames that broke out of the bomb were burning, melting, and exploding buildings. Scared of the heat of the bomb, people had jumped into lakes and rivers, but the water was boiling and the people too were burnt and killed. The animals in the water were already boiled to death. Animals, trees, herbs, fragrant flowering plants were all turned into ashes. The atomic energy destruction had just not stopped there. It had entered the atmosphere there and had spread radiation that would affect people for generations to come and would also bring about destructive irreversible biological change in animals and plants.

As the news of the atomic attack reached Einstein, and he became aware of the glaring horror of the abuse of atomic energy, his distress and restlessness knew no bounds. He could not control himself and picked up his violin to turn his mind on to other things. While playing the violin, he tried to dissolve his distress in its sad notes, but couldn't. He was burning on the embers of destruction; his heart was filled with an ocean of agony and tears just continued streaming uncontrollably out of his eyes. Night had fallen. His daughter came up and asked him to eat something as he had not taken anything for the last four days. His voice was restrained and he said, "I don't feel like eating."

He could not sleep that night. Lying down, he was thinking how he had drawn the attention of the then American President Roosevelt towards the destructive powers of an atomic bomb. He had thought that this would be used to scare Hitler and put an end to the barbarism that Hitler was up to. However, Roosevelt kept him in the dark and made false promises. Eventually, he had abused Einstein's equation of  $E = mc^2$  that resulted in the destructive experiments. His actions had made science and scientists as murderers. Einstein kept on thinking for a long time. Eventually, he slipped into sleep. When he woke up at dawn, there was a new dawn in him too. The atomic threat had transformed his heart.

### SET - 30. Q.(136 - 139)

The Indian Space Research Organisation (ISRO) announced another successful mission.

ISRO chairman S. Somanath said that three small satellites successfully separated and were injected into orbit.

ISRO had launched three small satellites powered by its SSLV-D2 launch vehicle from Satish Dhawan Space Centre at Sriharikota on February 10, 2023 at 09:18 AM IST. The launch vehicle was carrying EOS-07, Janus-1 & AzaadiSAT-2 satellites and aimed to inject them into a 450 km circular orbit. The launch took place at the first launch pad at SDSC SHAR, Sriharikota.

The SSLV-D2 had to take a 15 minutes flight to inject EOS-07, Janus-1 and AzaadiSAT-2 satellites into 450 km circular lower orbit. "It is configured with three solid propulsion stages and a velocity terminal module. It is a 34 m tall, 2 m diameter vehicle having a lift-off mass of 120 t," said ISRO. The EOS-07 satellite weighs 156.3 kg and is made by ISRO.

About 13 minutes into its flight, the SSLV rocket ejected EOS-07 and soon after that the other two satellites Janus-1 and AzaadiSAT-2 were ejected - all at an altitude of 450 km, said ISRO.

With the new rocket in its portfolio, ISRO will have three rockets - Polar Satellite Launch Vehicle (PSLV) and its variants (cost about Rs 200 crore), Geosynchronous Satellite Launch Vehicle (GSLV-MkII cost about Rs 272 crore and LVM3 Rs 434 crore) and SSLV (Development cost of three rockets about Rs 56 crore each) and production cost may go down later.

"New experiments include mm-Wave Humidity Sounder and Spectrum Monitoring Payload. Janus-1, a 10.2 kg satellite belongs to ANTARIS, USA. A 8.7 kg satellite AzaadiSAT-2 is a combined effort of about 750 girl students across India guided by Space Kidz India, Chennai," it added.

SSLV caters to the launch of up to 500 kg satellites to Low Earth Orbits on 'launch-on-demand' basis. "It provides low-cost access to Space, offers low turn-around time and flexibility in accommodating multiple satellites, and demands minimal launch infrastructure," as per a statement by ISRO

### SET - 31. Q.(140 - 143)

Wetlands are amongst the most productive ecosystems on the Earth and provide many important services to human society. They exhibit enormous diversity according to their genesis, geographical location, water regime and chemistry, dominant species, and soil and sediment characteristics. Globally, the areal

extent of wetland ecosystems ranges from 917 million hectares (m ha) to more than 1275 m ha. One of the first widely used wetland classifications systems, devised by Cowardin et al., 1979, categorized wetlands into marine (coastal wetlands), estuarine (including deltas, tidal marshes, and mangrove swamps), lacustrine (lakes), riverine (along rivers and streams), and palustrine (marshes, swamps and bogs) based on their hydrological, ecological and geological characteristics.

Ramsar Convention on Wetlands was an international treaty signed in 1971. Overall, 1052 sites in Europe; 289 sites in Asia; 359 sites in Africa; 175 sites in South America; 211 sites in North America; and 79 sites in Oceania region have been identified as Ramsar sites or wetlands of International importance.

As per the Ramsar Convention definition most of the natural water bodies (such as rivers, lakes, coastal lagoons, mangroves, peat land, coral reefs) and man-made wetlands (such as ponds, farm ponds, irrigated fields, sacred groves, salt pans, reservoirs, gravel pits, sewage farms and canals) in India constitute the wetland ecosystem distributed in different geographical regions ranging from Himalayas to Deccan plateau. As of February, 2022, India has 49 Ramsar sites covering an area of 10,93,636 hectares, the highest in South Asia. As per the estimates, India has about 757.06 thousand wetlands with a total wetland area of 15.3 m ha, accounting for nearly 4.7% of the total geographical area of the country. Out of this, areas under inland wetlands accounts for 69%, coastal wetlands 27%, and other wetlands (smaller than 2.25 ha) 4%.

Gujarat has the highest proportion (17.5%) and Mizoram has the lowest proportion (0.66%) of the area under wetlands. Among Union Territories, Lakshadweep has the highest proportion (around 96%) and Chandigarh has the least proportion (3%) of geographical area under wetlands.

In 2020-21, India's rice exports (Basmati and Non-Basmati) rose by a huge 87 per cent to 17.72 Million Tonne (MT) from 9.49 MT achieved in 2019-20.

In terms of value realisation, India's rice exports rose by 38 per cent to USD 8815 million in 2020-21 from USD 6397 million reported in 2019-20. In terms of Rupees, India's rice export grew by 44 per cent to Rs 65298 crore in 2020-21 from Rs 45379 crore in the previous year. It is anticipated that India's rice exports in 2021-22 would likely surpass the record feet of 17.72 MT achieved in 2020-21.

In 2020-21, India shipped non-basmati rice to nine countries - Timor-Leste, Puerto Rico, Brazil, Papua New Guinea, Zimbabwe, Burundi, Eswatini, Myanmar and Nicaragua, where exports were carried out for the first time or earlier the shipment was smaller in volume. India's Non-Basmati rice exports was valued at USD 4796 million (Rs 35448 crore) in 2020- 21, with Basmati Rice exports a close second at USD 4018 million (Rs 29,849 crore). In terms of volume of Basmati rice exports in 2020-21, top ten countries - Saudi Arabia, Iran, Iraq, Yemen, United Arab Emirates, United States of America, Kuwait, United Kingdom, Qatar and Oman have a share of close to 80 per cent in total shipments of aromatic long grained rice from India.

Top ten countries - Nepal, Benin, Bangladesh, Senegal, Togo, Cote D Ivoire, Guinea, Malaysia, Iraq, United Arab Emirates - have a share of 57 per cent in India's total exports of non-Basmati rice in 2020-21 in terms of volume.

As the Sun inches closer to its peak activity in its solar cycle, an explosion has been picked up behind the north-eastern limb of the star in our solar system. Solar observatories saw bits and pieces of the explosion, which remain obscured in view from Earth's orbit.

The explosion was spotted on 31 July at around 2309 UT and Earth-orbiting satellites registered a long-lasting C9.3-class solar flare. "The intensity is probably an underestimate because it was

partially eclipsed by the edge of the sun. Nasa's Solar Dynamics Observatory

(SDO) saw hot debris flying away from the blast site," space weather, which tracks the solar activity, reported.

While the explosion was powerful, experts have predicted that Earth is not in the line of fire from the Sun. Scientists are expected to get a view of the active region later this week as it comes to sight. Earth is not in the line of fire. The explosion is significant because it may herald an active region set to emerge over the sun's north-eastern limb later this week. A new sunspot group could bring an end to weeks of relative quiet," space weather said in its report.

Tens of thousands of people who lost their homes in a catastrophic earthquake huddled around campfires in the bitter cold and clamoured for food and water on Thursday, three days after the temblor hit Turkey and Syria and killed more than 19,300 on Monday, 6th February, 2023. Emergency crews used pick axes, shovels and jackhammers to dig through twisted metal and concrete - and occasionally still pulled out survivors.

In the Turkish city of Antakya, dozens scrambled for aid in front of a truck distributing children's coats and other supplies. Many of those who lost their homes found shelter in tents, stadiums and other temporary accommodation, but others slept outdoors. In Antakya, over 100 bodies were awaiting identification in a makeshift morgue outside a hospital. Authorities called off search-and-rescue operations in the cities of Kilis and Sanliurfa, where destruction was not as severe as in other impacted regions.

The U.N. is authorised to deliver aid through only one border crossing, and road damage has prevented that thus far. U.N. Officials pleaded for humanitarian concerns to take precedence over wartime politics. The scale of loss and suffering remained massive. Turkish authorities said on Thursday that the death toll had risen to more than 16,100 in the country, with more than 64,000 injured.

In Syria, which includes government-held and rebel-held areas, more than 3,100 have been reported dead and more than 5,000 injured.

Rescue teams urged quiet in the hope of hearing stifled pleas for help, and the Syrian paramedic group known as the White Helmets noted that every second could mean saving a life. But more and more often, the teams pulled out dead bodies. It was

not clear how many people were still unaccounted for in both countries. Turkey's disaster-management agency said more than 110,000 rescue personnel were now taking part in the effort and more than 5,500 vehicles, including tractors, cranes, bulldozers and excavators had been shipped. The Foreign Ministry said 95 countries have offered help. More than half of that number have sent a total of nearly 6,500 rescuers. Another 2,400 more are still expected to arrive. International aid for Syria was far more sparse. Efforts there have been hampered by the civil war and the isolation of the rebel-held region along the border that is surrounded by Russia-backed government forces.

Migaloo is by far one of the world's most recognisable whales, because he is completely white. Thanks to genetic sampling of Migaloo's skin, scientists have identified that he's male, and his albino appearance is a result of a variation in the gene responsible for the colour of his skin.

Simply by looking different, Migaloo has become an icon within Australia's east coast humpback whale population. Indeed, Migaloo has his own Twitter account with over 10,000 followers, and website where fans can lodge sightings and learn more about humpback whales. He was first discovered in 1991 off Byron Bay, Australia, and has since played hide and seek for many years, with many not knowing where or when he'll show up next. He's even surprised Kiwi fans by showing up in New Zealand waters.

With the last official sighting two years ago, the time has once again come for us to ask: where is Migaloo?

Already this year there have been false sightings, such as a near all white whale spotted off New South Wales. To make things more confusing, regular-looking humpbacks can trick whale watchers when they flip upside down, due to their white bellies.

It is not an exaggeration to say that the question of where and when the Black Death, the deadliest pandemic ever, originated is one of the biggest mysteries in human history. After all, the Black Death was the first wave of the second plague pandemic of the 14th to early 19th centuries. It killed some 50-60% of the population in Europe, the Middle East and North Africa and an unaccountable number of people in Central Asia.

Different proposals, based on competing theories, have been put forward. But in 2017, I came across some records describing an intriguing medieval cemetery in Kara-Djigach, Chuy Valley,

northern Kyrgyzstan, which I suspected may hold the key. As part of a multidisciplinary team co-led by Maria Spyrou at University of Tübingen, we have now investigated several specimens from individuals buried at that site - and come up with an answer.

The idea that the Black Death originated in the east - territories overlapping, roughly speaking, Central Asia, Mongolia and China - dates back to the contemporaries of the pandemic in Europe and the Islamic world. The modern, academic Chinese origin theory dates back to at least to in 1756-8 and a publication about the history of Central Asia by French scholar Joseph de Guignes.

While there is no denying that the world loves a winner, it is important that you recognise the signs of stress in your behaviour and be healthy enough to enjoy your success. Stress can strike anytime, in a fashion that may leave you unaware of its presence in your life. While a certain amount of pressure is necessary for performance, it is important to be able to recognise your individual limit. For instance, there are some individuals who accept competition in a healthy fashion. There are others who collapse into weeping wrecks before an exam or on comparing mark sheets and finding that their friend has scored better. Stress is a body reaction to any demands or changes in its internal and external environment.

Whenever there is a change in the external environment such as temperature, pollutants, humidity and working conditions, it leads to stress. In these days of competition when a person makes up his mind to surpass what has been achieved by others, leading to an imbalance between demands and resources, it causes psycho-social stress. It is a part and parcel of everyday life.

Stress has a different meaning, depending on the stage of life you are in. The loss of a toy or a reprimand from the parents might create a stress shock in a child. An adolescent who fails in the examination may feel as if everything has been lost and life has no further meaning. In an adult the loss of his or her companion, job or professional failure may appear as if there is nothing more to be achieved.

Such signs appear in the attitude and behaviour of the individual, such as muscle tension in various parts of the body, palpitation and high blood pressure, indigestion, and hyperacidity.

Ultimately, the result is self-destructive behaviour such as eating and drinking too much, smoking excessively, relying on tranquilisers. There are other signs of stress such as trembling, shaking, nervous blinking, dryness of throat and mouth and difficulty in swallowing.

The professional under stress behaves as if he is a perfectionist. It leads to depression, lethargy, and weakness. Periodic mood shifts also indicate the stress status of the students, executives, and professionals.

Ghana was the first true African state. The reason why we are saying this is that most African states lived in tribal villages but Ghana was the centre of gold trade. This gold trade opened new possibilities for the Ghanaians. The gold trade roots back to the 4th century, when African Soninke tribes were under the rule of the Maga, a Berber clan originating from Morocco. This clan has mastered trans-Saharan camel travel. They were known for trading salt for gold from the Soninke.

When the Arabs invaded North Africa, there was an upsurge in the trade in gold. Ghana became rich and soon after, the Soninke ousted the Maga and built their own nation under Kaya Magan Cisse, who became the Soninke king around 790.

Ghana's ancient capital, Koumbi Salah, was the city where Africans and Berbers met and traded. Arab traders in the 9th century described Ghana as 'the land of gold.' The gold came from Asante and Senegal, to the south and west. The trade routes led north and east to Morocco, Libya and Aksum and so on to Europe and Asia.

Ghana had reached its peak in the 10th century. This was the country which controlled both the gold and salt trades. Other trading goods included woollen clothes, luxury items, leather goods and slaves. Traders transported goods hundreds of kilometres across the Sahara desert with camel caravans.

On May 2, 2018, severe dust storms and thunderstorms hit parts of Rajasthan, Uttar Pradesh, and other adjoining regions. Explaining the reasons behind such severe weather system, M. Mohapatra, senior scientist with the India Meteorological Department (IMD) said that dust storms and thunderstorms are a result of nearly similar weather conditions, like intense heat. Areas that have moisture in the air experience thunderstorms while those which don't have moisture experience dust storms.

"All such conditions were being fulfilled on that day. The region had moist easterly winds coming from the Bay of Bengal and there was western disturbance system too. All this together triggered the events on May 2," he added.

In simple terms, dust storm can be explained as a phenomenon when strong winds carry dust over an extensive area.

As far as the timing of their occurrence is concerned, Mohapatra stated that there is no deviation in time of occurrence of a dust storm and thunderstorm activity as they usually peak in the pre-monsoon period. These events happen between March and May only. In the pre-monsoon period temperatures are very high, around 44-45 degree Celsius and lead to such activities. Even as dust storms and thunderstorms are a common feature every year there has been no focused work on studying the trends related to it.

"In the coming years there could be more instances of intense thunderstorms and sand storms but they have to be studied in detail looking at the data of over 30-40 years to notice a trend. Work has been more or less confined to cyclones and monsoon systems but not much on dust storms or thunderstorms. It needs study," admitted Mohapatra.

The extent of damage caused by thunderstorm activity in India can be gauged from the data of India's National Crime Records Bureau (NCRB). As per the NCRB data, compared to other natural disasters like cyclone, floods or heat waves, lightning kills more people in India. For instance, at least 25 percent of the 10,510 accidental deaths attributable to forces of nature in 2015 were due to lightning. The number of deaths due to lightning has constantly remained over 2,000 every year since 2005.

A new and extreme tourist attraction has just exploded on to the scene in Iceland: Volcano Walking. It would appear, according to Trip Advisor, that this is one trip that cannot be missed, despite the extortionate cost.

The idea of making Thrihnukagigur volcano accessible was the brainchild of Ami B. Stefansson, a doctor in Reykjavik and a lifelong cave enthusiast. He has been studying caves in Iceland since 1954 and some would argue that there is no-one who has more experience. Thrihnukagigur has always been special to Stefansson ever since he was the first to descend down to the crater base in 1974. Like most people who experience it, he was utterly spellbound by its uniqueness and beauty and made it his mission to protect and preserve this stunning natural phenomenon. Unlike others who may have only seen the profit that could be made from walking into the mouth of a volcano, Stefansson believed that the primary focus was to treat such a grand natural wonder with the utmost respect, to protect and defend it. The first 'volcano tourists' entered the volcano in 2005 and it has since been labelled as one of the most unique tourist attractions in the world.

Volcano walkers are taken to the mouth of the crater from where they are lowered in a basket into the depths of the earth. People once thought that volcanoes were portals to Hell and associated with death and destruction and yet the entrance to the crater is awe-inspiring and almost ethereal. The vastness of it can feel overwhelming; it is the size of a cathedral and the Statue of Liberty could easily fit into the shaft. After 6 minutes and 120 metres, visitors arrive at the crater base. The ground space is the size of three full-sized basketball courts placed next to each.

At the bottom there is a reverent hush. People whisper in respect to the sleeping giant who has lain dormant for 4,000 years. The subterranean walls are scorched with colours from a divine palette: magenta red, vibrant purple, burnt orange, vivid green and honey yellow. The colour intensifies in certain places where 4000 years ago the magma was pushed out with brutal force. This is Mother Nature's secret place, her private art studio where visitors feel like trespassers. The protruding rock faces show a tapestry of patterns and formations that have been molded by heat, pressure and time. Floodlights illuminate the walls and draw attention to the beauty humans were never intended to see. A light rain weeps from the porous rock above and covers the crater sides with a shine that makes it sparkle. The scorch marks can be seen close up – at one point in time these rock faces were glowing red with fiery heat. This giant, although sleeping, is still dangerous: an 80-metre drop into the void is disguised by a collection of rocks close to where visitors stand. It is a soul-enriching experience and visitors often report feeling deeply moved by the beauty and tranquillity of something that was once so destructive and angry. Confronted with this result of the unrestrained forces of nature, it is hard not to feel small and powerless in comparison. Sadly, the magical spell is broken

when the basket appears, indicating that it is time for visitors to return to reality. On the return hike, visitors walk across the lava fields as though they are astronauts on the moon. They pass enormous open wounds where the landscape is literally tearing itself apart as tectonic plates slowly shift. It serves as one final reminder that this giant is merely dormant, not dead.

At the end of 2020, there were 82.4 million forcibly displaced people in the world, of which more than a quarter are refugees.

"By the end of 2020, the number of people forcibly displaced due to persecution, conflict, violence, human rights violations, and events seriously disturbing public order, had grown to 82.4 million, the highest number on record according to available data," according to the UN High Commissioner for Refugees (UNHCR). Out of these 82.4 million forcibly displaced people in the world, more than a quarter are refugees.

Just five countries produce 68% of all refugees displaced abroad: the Syrian Arab Republic, Venezuela, Afghanistan, South Sudan, and Myanmar.

The top five host countries, where these displaced people are currently located are: Turkey, Colombia, Germany, Pakistan, and Uganda.

With 3.7 million displaced people now within its borders, Turkey hosts twice as many refugees as Colombia, the next highest host country, with 1.7 million people. The situation in Turkey illustrates the effects of proximity, as 92% of its refugees have come from neighbouring Syria, where war and armed conflict have now been raging for more than 10 years. It demonstrates that huge numbers of displaced people stay close to their point of origin.

There are more than 48 million internally displaced people – people who have had to flee their homes in search of safety elsewhere within their home nation.

The highest increases in the number of internally displaced people happened in Africa and were provoked by a combination of armed conflict and humanitarian disasters. Civil war in Ethiopia, Africa's second most-populated country, has sparked a wave of displacement in a region that was already facing what the UNHCR calls "a full-scale humanitarian crisis." All in all, more than a million Ethiopian people had to leave their homes behind last year, the UNHCR says.

The savanna landscape is typified by tall grass and short trees. It is rather misleading to call the savanna 'tropical grassland', because trees are always present with the luxuriant tall grass. The terms 'parkland' or 'bush-veld' perhaps describe the landscape better.

Trees grow best towards the equatorial humid latitudes or along river banks but decrease in height and density away from the equator. They occur in clumps or as scattered individuals. The trees are deciduous, shedding their leaves in the cool, dry

season to prevent excessive loss of water through transpiration, e.g. acacias. Others have broad trunks, with water-storing devices to survive through the prolonged drought such as baobabs and bottle trees. Trees are mostly hard, gnarled and thorny and may exude gum like gum arable. Many trees are umbrella shaped, exposing only a narrow edge to the strong winds.

Palms which cannot withstand the drought are confined to the wettest areas or along rivers. Vegetative luxuriance reaches its peak in the rainy season, when trees renew their foliage and flower. In true savanna lands, the grass is tall and coarse, growing 6 to 12 feet high. The elephant grass may attain a height of even 15 feet! The grass tends to grow in compact tufts and has long roots which reach down in search of water. It appears greenish and well-nourished in the rainy season but turns yellow and dies down in the dry season that follows. The grass lies dormant throughout the long, rainless period and springs up again in the next rainy season.

In between the tall grass are scattered short trees and low bushes. As the rainfall diminishes towards the deserts the savanna merges into thorny scrub. In Australia, this scrubland is particularly well represented by a number of species: mallee, mulga, spinifex grass and other bushes.

The savanna, particularly in Africa, is the home of wild animals. It is known as the 'big game country' and thousands of animals are trapped or killed each year by people from all over the world. Some of the animals are tracked down for their skins, horns, tusks, bones or hair, others are captured alive and sent out of Africa as zoo animals, laboratory specimens or pets. There is such a wealth of animal life in Africa that many of the animal films that we see at the cinema are actually taken in the savanna. There are, in fact, two main groups of animals in the savanna, the grass-eating herbivorous animals and the fleshing-eating carnivorous animals. The herbivorous animals are often very alert and move swiftly from place to place in search of green pastures.

They are endowed with great speed to run away from the savage flesh-eaters that are always after them. The leaf and grass-eating animals include the zebra, antelope, giraffe, deer, gazelle, elephant and okapi.

Many are well camouflaged species and their presence amongst the tall greenish-brown grass cannot be easily detected. The giraffe with such a long neck can locate its enemies a great distance away, while the elephant is so huge and strong that few animals will venture to come near it. It is well equipped with tusks and trunk for defence.

The carnivorous animals like the lion, tiger, leopard, hyena, panther, jaguar, jackal, lynx and puina have powerful jaws and teeth for attacking other animals. Their natural colorings of light yellowish-brown, often with stripes like the tiger or spots like the leopard, match perfectly with the tawny background of the savanna. They often hide themselves in shady spots up in the branches or amidst the tall bushes, and many wild animals, as well as hunters themselves, are caught unawares in this manner. **SET - 43. Q.(206 - 210)**

Between him and Darcy there was a very steady friendship, in spite of great opposition of character. Bingley was endeared to Darcy by the easiness, openness, and ductility of his temper,

though no disposition could offer a greater contrast to his own, and though with his own he never appeared dissatisfied. On the strength of Darcy's regard Bingley had the firmest reliance, and of his judgment the highest opinion. In understanding, Darcy was the superior.

Bingley was by no means deficient, but Darcy was clever. He was at the same time haughty, reserved, and fastidious, and his manners, though well bred, were not inviting. In that respect his friend had greatly the advantage. Bingley was sure of being liked wherever he appeared, Darcy was continually giving offence.

The manner in which they spoke of the Meryton assembly was sufficiently characteristic.

Bingley had never met with pleasanter people or prettier girls in his life; everybody had been most kind and attentive to him; there had been no formality, no stiffness; he had soon felt acquainted with all the room; and as to Miss Bennet, he could not conceive an angel more beautiful. Darcy, on the contrary, had seen a collection of people in whom there was little beauty and no fashion, for none of whom he had felt the smallest interest, and from none received either attention or pleasure. Miss Bennet he acknowledged to be pretty, but she smiled too much.

Mrs. Hurst and her sister allowed it to be so—but still they admired her and liked her, and pronounced her to be a sweet girl, and one whom they should not object to know more of.

Miss Bennet was therefore established as a sweet girl, and their brother felt authorised by such commendation to think of her as he chose.

The search for life on Mars has become more urgent thanks in part to probes by the two rovers now roaming Mars' surface and another spaceship that is orbiting the planet. In recent months, they've made a series of astonishing discoveries that, once again, tempt scientists to believe that Mars harbours life—or did so in the past. At a February conference in the Netherlands, an audience of Mars experts was surveyed about Martian life. The enthusiasm to own Electric Vehicles (EV) is increasing among the people. Though it costs 40-45% higher than usual fuel vehicles, saving on petrol and diesel and contributing to saving our mother earth are rational reasons to buy it. Some

companies already have started selling EVs. Well reputed Tata Motors is in the first row with its Nexon EV release. Hundreds of start-ups have already started selling electric two-wheelers. The customers need to know that there are certain grave issues to be understood. The principal one is the lack of charging and maintenance infrastructure. Those who have independent houses have the facility of installing a charging setup but in apartments, it is a real challenge. There have been some recent fire incidents in EV bikes' batteries. The minister for road transport and highways, Nitin Gadkari warned the companies to recall faulty vehicles. Another serious challenge is that when there are many EVs, can the governments provide sufficient electricity? Now power cuts are everywhere as there is not much coal availability. What and how it will be in the future is a serious question to be answered. It is good to imagine that the roads of India are full of electric vehicles and no more noise and no more thick smoke from the vehicles. It is also estimated that in two or three years as the price comes down and present issues with EVs are addressed we will see many such vehicles on our roads.

#### SET - 48. Q.(231 - 235)

A piano teacher described an interesting encounter she had had with a young lady who came to inquire about music lessons. The young lady asked her, "How long will this course take? My father tells me that it is in fashion now to be able to play musical instruments and that I should learn one quickly. I want something that will be quick, fast and easy like, like...." When the amused teacher explained that it would take a lifetime of meticulous practice to learn music, her face fell and, needless to say, she never came back.

The single most important factor that distinguishes those of us who succeed in any venture and those of us who don't is this 'instant coffee' attitude. Most of us want results quickly. We want to reach the top immediately and get worked up when things go wrong. Perseverance and patience are forgotten words. We get upset, frustrated, and angry when a skill or activity requires us to put in a lot of effort and time. We get dejected and want to give it up.

But such thinking serves no good. For, it doesn't solve the problem. Life is tough for those with an 'instant coffee' attitude. Success, real success and happiness come to those who have a 'bread-making' attitude those who are willing to knead the dough, wait for hours for it to rise, only to punch it down and knead some more, wait for another couple of hours for it to rise

again, and then bake it before it is ready to be eaten. Nothing is instantaneous. For every endeavour – whether in the area of career, academics, music, sports, relationships, physical fitness or even in spirituality – it is a long, arduous journey.

Only if we are willing to put in the time, painstaking effort and have faith, can we get results. If we don't accept this difficult-but-true fact of life, our lives will be far from being happy and fulfilling. For we may not make that extra effort which can change the course of life dramatically, for the good.

The major problems with these 'instant coffee' solutions are that they are invariably short lived. If we stubbornly refuse to give up this search for quick solutions, all we do is end up on the wrong track.

#### SET - 49. Q.(236 - 240)

Although pollution of land, sea, and air has been well documented, the latest and the least recognised version is the swelling tide of noise which is engulfing urban as well as rural areas. This has long-term implications on the ecology, health and productivity of a fast developing country like India.

Unlike other pollutants, noise lacks visibility, seldom registering on the consciousness, except as a trifling irritant to be dismissed at will and therefore less likely to be perceived as a threat. Available data indicates that noise does pose a threat to health and is known to have caused a number of complications.

Declining productivity among workers in certain industries has been directly correlated with noise levels, particularly those under constant exposure to the menace.

The first-ever survey of the impact of noise on health, conducted by All India Institute of Medical Sciences (AIIMS), has established that noise not only impairs the physical and psychological functioning of the human organism but also causes nausea, vomiting, pain, hypertension and a lot of other complications, including cardio-vascular complaints. A study by

Post Graduate School of Basic Medical Sciences, Chennai, confirms such conclusions. In 50 per cent of industries, it was found that workmen exposed to higher intensities of noise in occupational capacities were often irritated, short-tempered and impatient and more likely to resort to agitation and disrupt production. This was true of units in heavy industrial pockets in and around the four metropolitan centres.

Recreational noise, another ugly facet, is becoming more widespread in cities and towns. Loudspeakers are turned at full volume during marriages, festivals, jagr, musical programmes, particularly at night, without the least consideration for others. Even at 50 dB, sound can awaken a person from a deep slumber. As experiments have shown, loudspeakers with output from 60 to 80 dB cause the pupils of a slumbering person to dilate, with increasing intake of oxygen, resulting in palpitation. The effect is more pronounced in narrow lanes. TV sets are played at full volume at prime time, invariably disturbing neighbours. Noise making seems to have become the latest status symbol, be it an election campaign or slogan shouting or advertising ownership of a TV set.

SSC CGL Tier II (29/01/2022)

**Q.236.** In what way does noise become a status symbol?

- (a) Exposing workmen to high intensity sounds
- (b) Showing off the loud volume of one's TV
- (c) Awakening people from deep sleep
- (d) Conducting late night musical shows

**Q.237.** According to a survey conducted by AIIMS, noise does NOT cause:

- (a) heart related complaints (b) eye infections
- (c) hypertension (d) nausea and vomiting

**Q.238.** Noise can be differentiated from other pollutants because:

- (a) it does not impact the productivity of the workers in industries
- (b) it is regarded as a small irritant which may be easily dismissed
- (c) it is not detrimental to our health in any way
- (d) it is prevalent only in the urban areas of the country

**Q.239.** Recreational noise is created during:

- (a) discord between agitated workers
- (b) running of heavy machinery
- (c) weddings and festivals
- (d) shouting of slog

**Q.240.** Which of the following statements is FALSE?

- (a) Loudspeakers with low decibel sound can cause palpitations.
- (b) Several studies have been conducted on air, water and land pollution.
- (c) There is a direct correlation between productivity of workers and noise.
- (d) Noise pollution is not visible to the eyes.

The severe cyclonic storm, Nisarga, which made a landfall south of Alibag in Maharashtra's Raigad district on Wednesday at 11.30 a.m. is an indication of an increasing frequency of severe cyclones developing in the Arabian Sea in the past decade, a trend that studies have linked to climate change. In the past two years, there have been seven cyclones in the Arabian Sea, though, according to India Meteorological Department (IMD), the ratio of cyclones in the Arabian Sea and the Bay of Bengal –

which just witnessed the destructive cyclone Amphan on May 21 – is 1:(d) The Intergovernmental Panel on Climate Change (IPCC) last year came out with a special report, Ocean and Cryosphere in a Changing Climate, in which it said that extreme rainfall and extreme sea level events associated with some tropical cyclones are being seen to have a cascading impact on coastal areas.

"There is emerging evidence for an increase in annual global proportion of Category 4 or 5 tropical cyclones in recent decades," the IPCC report had said. A category 4 cyclone has a wind speed of 209-251 kmph, and is referred to as an extremely severe cyclonic storm, while a category 5 cyclone has a wind speed of more than 252 kmph, and is referred to as a super cyclone. The IPCC report refers to a 2017 study led by Atmospheric and Oceanic Sciences Program, Princeton University, USA, which found that in 2014 and 2015, post-monsoon extremely severe cyclonic storms (ESCS) were first observed over the Arabian Sea causing widespread damage. The study had concluded that climate change had led to an increase in the occurrence of ESCSs in the Arabian Sea.

"Our research suggests that cyclones would be more frequent during the post monsoon season (October-December) by a series climate model simulations. However, we didn't find any significant changes in cyclone activity during the pre-monsoon (April-June) season through the climate simulations. It is very difficult to identify if a cyclone (like Nisarga) is generated in line with climate change," said Hiroyuki Murakami, the lead author of the study.

"Coastal hazards will be exacerbated by an increase in the average intensity, magnitude of storm surge, rising mean sea levels and precipitation rates of tropical cyclones," the IPCC report further stated.

**SET - 51. Q.(246 - 250)**

The term 'dietary fibres' refers collectively to indigestible carbohydrates present in plant foods. The importance of these dietary fibres came into the picture when it was observed that the people taking a diet rich in these fibres had low incidence of coronary heart disease, irritable bowel syndrome, dental caries and gall stones. The foodstuffs rich in these dietary fibres are cereals and grains, legumes, fruits with seeds, citrus fruits,

carrots, cabbage, green leafy vegetables, apples, melons, peaches, pears etc. These dietary fibres are not digested by the enzymes of the stomach and the small intestine.

They have the property of holding water and because of it, these get swollen and behave like a sponge as these pass through the gastrointestinal tract. The fibres add bulk to the diet and increase transit time in the gut and decrease the time of release of ingested food in the colon. These fibres hold water so the stools are soft, bulky and readily eliminated. In recent years, it has been considered essential to have some amount of fibres in the diet. Their beneficial effects lie in preventing heart disease and decreasing cholesterol level. The fibres like gum and pectin are reported to decrease post prandial (after meals) glucose level in blood. They are also recommended for the management of certain types of diabetes. The fibres increase motility of the small intestine and the colon and so there is less time for exposure of the mucosa to harmful toxic substances.

Therefore, there is a less desire to eat and the energy intake can be maintained within the range of requirement. This phenomenon helps in keeping a check on obesity. The dietary fibres may have some adverse effects on nutrition by binding some trace metals like calcium, magnesium, phosphorus, zinc and others and therefore preventing their proper absorption. This may pose a possibility of nutritional deficiency especially when diets contain marginal levels of mineral elements. This may put constraints on increasing dietary fibres. It is suggested that an intake of 40 gram dietary fibres per day is desirable.

**SET - 52. Q.(251 - 255)**

The methods of embalming, or treating the dead body, that the ancient Egyptians used is called 'mummification'. Using special processes, the Egyptians removed all moisture from the body, leaving only a dried form that would not easily decay. It was important in their religion to preserve the dead body in as life-like a manner as possible. The mummification process took seventy days. Special priests worked as embalmers, treating and wrapping the body. Beyond knowing the correct rituals and prayers to be performed at various stages, the priests also

needed a detailed knowledge of human anatomy. The first step in the process was the removal of all internal parts that might decay rapidly. The brain was removed by carefully inserting special hooked instruments up through the nostrils in order to pull out bits of brain tissue. The embalmers then removed the organs of the abdomen and chest through a cut usually made on the left side of the abdomen. They left only the heart in place, believing it to be the center of a person's being and intelligence. The other organs were preserved separately, with the stomach, liver, lungs and intestines placed in special boxes or jars, today called 'canopic jars'. These were buried with the mummy. The embalmers next removed all moisture from the body. This they did by covering the body with 'natron', a type of salt which has great drying properties, and by placing additional natron packets inside the body. When the body had dried out completely, embalmers removed the internal packets and lightly washed the natron off the body. The result was a very dried-out but recognizable human form. To make the mummy seem even more life-like, sunken areas of the body were filled out with linen and other materials and false eyes were added. Next the wrapping began. Each mummy needed hundreds of yards of linen. The priests carefully wound the long strips of linen around the body, sometimes even wrapping each finger and toe separately before wrapping the entire hand or foot. In order to protect the dead from mishap in after life, amulets were placed among the wrappings and prayers and magical words written on some of the linen strips. Often the priests placed a mask of the person's face between the layers of head bandages. At last, the priests wrapped the final cloth or shroud in place and secured it with linen strips. The mummy was complete. It was then placed in the tomb along with food, furniture, vessels, perfumes, jewels and other things required in the afterlife.
